Appendix S: Non-Discrimination Policy.....	15530

Chapter 1: Program Overview

The Doctor of Psychology (PsyD) degree program in School Psychology at the University of Colorado Denver (CU Denver) prepares Health Service Psychologists (HSP) in the practice area of School Psychology. The degree leads to licensure in School Psychology by the Colorado State Department of Education. Additionally, students completing the program are eligible to apply for National Certification in School Psychology administered by the National School Psychology Certification Board, as well as for psychologist licensure by the Colorado State Board of Psychologist Examiners and licensure in most other states. Our 100-semester-hour graduate program generally admits students only on a full-time basis, though exception requests will be considered on a case-by-case basis.

Program Philosophy

The CU Denver School Psychology Program, guided by the belief that all children can learn, is dedicated to providing both breadth and depth of professional training in a theoretically-integrated, research-based learning environment. Consistent with a practitioner-scholar model, the PsyD Program in School Psychology prepares professional school psychologists through rigorous academic study integrated with intensive supervised clinical practice. The program includes an emphasis on prevention and the ecological influences on behavior, as well as respect for all aspects of diversity. Students also receive substantial training regarding working in diverse, urban environments, and the program promotes advocacy and social justice throughout training experiences.

The program is based on the *Accreditation Domains and Standards* of the American Psychological Association (APA) and the *Model for Comprehensive and Integrated School Psychological Services* endorsed by the National Association of School Psychologists (NASP). This model and these standards promote the following domains of psychology: data-based decision-making and accountability; consultation and collaboration; direct psychological interventions and mental health services to develop social and life skills; school-wide practices to promote learning; preventative and responses services; family-school collaboration services; diversity and individual differences in development and learning; social and physiological bases of behavior; research and program evaluation; and legal, ethical and professional practice.

Currently, the program is fully accredited by APA and is NASP approved.

Information about APA accreditation can be found at:

Commission on Accreditation

Office of Program Consultation and Accreditation

Program Aims and Student Learning Outcomes

Specific PsyD Program aims and competencies include the following:

Aim 1: To train health service psychologists (HSPs) to deliver school psychological services.

- *Ethical and Legal Standards Competency:* Students must be knowledgeable of and act in accordance with relevant professional standards, and legal and ethical guidelines.
- *Individual and Cultural Diversity Competency:* Students must demonstrate knowledge, awareness, sensitivity, and skills when working with diverse individuals and communities.
- *Professional Values, Attitudes, and Behaviors Competency:* Students must behave in ways that reflect the values and attitudes of health service psychology, including integrity, professional identity, accountability, lifelong learning, and concern for the welfare of others.
- *Communication and Interpersonal Skills Competency:* Student must maintain effective professional relationships, including demonstrating effective communication skills.
- *Assessment Competency:* Students must demonstrate competence in conducting evidence-based assessments consistent with the scope of Health Service Psychology.
- *Intervention Competency:* Students must demonstrate competence in evidence-based interventions consistent with the scope of Health Service Psychology.
- *Supervision Competency:* Students must demonstrate knowledge of supervision models and practices.
- *Consultation and interprofessional/interdisciplinary Skills Competency:* Students must demonstrate knowledge of consultation models and practices, and respect for the roles and perspectives of other professions.

Aim 2: To train leaders in the field who promote evidence-based practices (EBPs) appropriate for the particular context in which psychology is being practiced.

- *Research Competency:* Students must demonstrate knowledge, skills, and competence sufficient to contribute to and disseminate research that is appropriate for the scope and expectations of the practice context.
- *Research Competency:* Students must critically evaluate and use existing knowledge within the practice of health service psychology.
- *Program Specific Competencies:*
 - Demonstrates knowledge of general education, special education, educational and related services, including how the system works as a whole.
 - Demonstrates skill in identifying individuals or groups, ages birth to twenty-one, who may benefit from targeted interventions, instructional supports, and psychological services, using screening, progress monitoring, and other tools.
 - Demonstrates the ability to plan and implement interventions at different levels (e.g., individual, group, classroom, and systems level), including positive behavioral supports (e.g., classroom accommodations, FBAs, etc.).
 - Demonstrates an understanding of school-based crisis intervention strategies (e.g., suicide risk assessment, threat assessment, crisis response, etc.) and provides crisis intervention as needed.

School Psychology Faculty

- ★ **Franci Crepeau-Hobson, Ph.D.**, Professor, Program Director and training Director for the Colorado School Psychology Internship Consortium (Cos-PIC) (University of Northern Colorado, PhD program).
Phone: 303-315-6315. Email: franci.crepeau-hobson@ucdenver.edu.
Areas of interest and research: School safety, Crisis response and intervention, youth suicide prevention and intervention, psychological assessment, ethics.
- ★ **Bryn Harris, Ph.D.**, Professor (Indiana University, PhD program).
Phone: 303-315-3899. Email: bryn.harris@ucdenver.edu.
Areas of interest and research: Culturally responsive assessment and intervention; assessment of autism within bilingual populations; disproportionality of bilingual in special education; acculturation and immigration.
- ★ **Rachel Stein, PhD.**, Assistant Professor (University of California, Santa Barbara, PhD program).
Phone: 213-632-8263. Email: rachel.m.stein@ucdenver.edu
Areas of interest and research: prevention and early intervention to support mental health, identifying mental health needs in early childhood, young children's mental health and challenging behaviors, early childhood workforce development, and early childhood/preschool school psychology.

We also have a group of knowledgeable, skilled practitioners who serve as honorarium instructors and are employed as psychologists, school psychologists, or administrators.

Diverse Student Population

A strength of our program is that we enroll students from diverse professional and educational backgrounds. The School Psychology program at the University of Colorado Denver strives to ensure equitable access to, and participation in, the program by individuals with disabilities and those from minoritized backgrounds who are historically underrepresented in the profession of School Psychology. Approximately 18% of our students come from racially/ethnically diverse backgrounds. Many students in the program have been previously employed as special and regular education teachers, school counselors, school administrators, mental health counselors, social workers, or Registered Behavior Technicians.

Professional Organizations

Today, leadership in School Psychology emerges from two prominent national professional associations: the National Association of School Psychologists (NASP), and Division 16 (School Psychology) of the American Psychological Association (APA). These organizations have established training guidelines, accreditation standards, ethical guidelines, and numerous publications. In addition, they have been involved in intense lobbying efforts promoting children's educational and psychological needs, as well as professional concerns in School Psychology. In addition, we enjoy one of the strongest state school psychology associations in the nation: the Colorado Society of School Psychologists (CSSP).

CU Denver school psychology students are **REQUIRED** to join NASP and CSSP as student members. We encourage students to join APA and APA Division 16 as well.

The National Association of School Psychologists recognizes all licensed school psychologists as full members. The association currently has over 24,000 members and publishes the peer-reviewed journal *School Psychology Review*, as well as a newsletter, the *Communiqué*. The *NASP Model for Comprehensive and Integrated School Psychological Services*, also known as the NASP Practice Model, represents NASP's official policy regarding the delivery of school psychological services. Policy statements developed by NASP include the *Standards for the Provision of School Psychological Services* and *Ethical Standards for the Practice of School Psychology*. Additionally, NASP has released numerous position papers addressing such topics as ability grouping, racism, early intervention services, AIDS, and the use of corporal punishment in schools, just to name a few. In addition, NASP administers the National School Psychology Certification Board to which practitioners may apply for national certification (NCSP). NASP hosts an annual convention each spring, featuring peer-reviewed paper presentations, invited addresses by prominent scholars, and workshops on practices and skills relevant to School Psychology.

Locally, the Colorado Society of School Psychologists (CSSP) is a state affiliate of NASP and accepts any Colorado-licensed school psychologists as full members. Additionally, affiliate memberships are available to interested professionals in related fields, and student memberships are available to individuals engaged in graduate study in School Psychology. CSSP hosts an annual convention each fall, incorporating invited speakers, submitted papers, and at least one full-day workshop on important skills or issues in School Psychology. CSSP also monitors state legislative issues for members, publishes a state newsletter, and sponsors continuing education opportunities around the state.

Division 16 (School Psychology) of the American Psychological Association recognizes all doctoral-level psychologists as full members. The division has approximately 2,000 members and publishes the peer-reviewed journal *School Psychology* as well as the newsletter *The School Psychologist*. Policy statements developed by Division 16 include *Specialty Guidelines for School Psychological Services*; the American Psychological Association's *Standards for Psychologists*, *Standards for Educational and Psychological Tests and Measures*, and *Standards for the Use of Computers*. The American Psychological Association hosts an annual convention each summer. Similar to NASP's convention, APA's convention includes peer-reviewed paper presentations, invited addresses by prominent scholars, and workshops on practices and skills. Because the convention incorporates all APA specialty areas, presentations are more diverse and include those relevant to the practice of School Psychology and other fields of psychology.

Student Affiliates in School Psychology (SASP)

Student Affiliates in School Psychology (SASP) is a student-led organization of the American Psychological Association (APA), Division 16. The goals of the CU Denver SASP chapter include keeping graduate students apprised of issues in school psychology, hosting events or bringing in speakers to increase student engagement and learning and participating in outreach activities that strengthen the field of school psychology and the program at CU Denver. To participate in SASP, members are not required to join the American Psychological Association or APA's Division of School Psychology (Division 16). However, members interested in becoming associated with the national SASP organization are encouraged to join Division 16.

SASP serves as a forum for collaboration with professors, support for students, and advocacy for program enhancement. Concerns and feedback about the program that faculty want to share anonymously can be emailed to the SASP officers. SASP officers will meet with the program faculty on an as-needed basis to share concerns and feedback anonymously.

SASP welcomes new members at any time and provides a Mentor Program for new SPSY students. All first-year students are assigned a mentor. At the beginning of the second year, all students are expected to mentor a more junior student.

Please email cu.denver.sasp@gmail.com with interests, questions, or concerns. In addition, please email SASP if you would like to be or have a mentor, provide school contact information, or utilize our database of school connections.

Global Majority Collective (GMC)

The Global Majority Collective (GMC) is a student-led organization that aims to empower students from racial or ethnic minoritized groups throughout the four years of the SPSY doctoral program, in which structural forces shape students' experiences differently than those of people from dominant cultures.

By fostering social bonds and designating a safe space for students to connect with peers who share their identities, GMC leadership hopes that diverse students will feel less isolated and more connected to the program as a whole. The group also focuses on providing a more equitable future for our program's attendees by collectively promoting initiatives to help SPSY program faculty achieve the same goals. GMC leaders meet regularly with faculty and the Program Director to share information and foster a safe climate and social justice initiatives.

A special note for our allies

The formation of this group is not to create barriers between us and our allies. Meetings and events that include our allies are in the works. However, in order to be a member, you must identify with a racial or ethnic minoritized group. The rationale behind this is to provide a much-needed safe space for students in our program to validate and be validated by like others.

Please email globalmajoritycollectivespsy@gmail.com if you are interested in joining or if you have questions.

Chapter 2: Getting Started

Admissions Requirements

Requirements for admission are competitive and based on the following information: (a) undergraduate GPA, (b) previous graduate GPA, if applicable, (c) match between the applicant's goals and objectives of the program, and (d) letters of reference. GRE scores are no longer required.

Although the program does not have strict cut-off scores, applicants with a GPA below 3.2 typically will not be considered for admission, though we do consider the entire application. Applicants are selected on a competitive basis from those who meet the minimum requirements. The program typically accepts around 15% of applicants, depending on the size and characteristics of the applicant pool. These parameters vary somewhat from year to year. Undergraduate GPAs of accepted students average around 3.64, typically ranging from about 3.0 to 4.0. Psychology is the most common undergraduate major among accepted applicants, although we welcome applicants with diverse undergraduate majors.

Enrolling in Courses Prior to Admission

Students who choose to begin coursework for the PsyD in School Psychology prior to gaining admission to the program must enroll as non-degree-seeking students. Up to 9 credit hours can be transferred to your School Psychology program if you are subsequently admitted. Information about enrolling in courses as a non-degree student is available at <https://www.ucdenver.edu/admissions/non-degree-admissions>. There is no guarantee that applicants who complete program courses beforehand will be admitted to the program.

University Residency Requirement

To meet the university's "residency requirement" for the School of Education & Human Development graduate programs, as well as APA, students must demonstrate that they were full-time students at the university for at least two consecutive semesters prior to their internship while completing their program of study. This residency requirement allows students to establish that they are an integral part of the university community. To be considered "full-time", a student must carry the equivalent of no fewer than five semester hours of work in graduate courses for two consecutive semesters. Students who are noticeably deficient in their general training or in the specific preparation required by each department as a prerequisite to graduate work cannot expect to obtain a degree within the minimum time specified.

Time Limits for Degree Completion

The School of Education & Human Development allows a maximum of eight (8) years to complete the Doctor of Psychology degree in School Psychology.

Graduate Assistantships

There are a limited number of graduate assistantship positions available across campus each year. You are allowed to work up to 20 hours per week in exchange for a stipend. These are mainly

grant-funded opportunities and vary greatly from year to year. As they become available, these position announcements will be posted on the School of Education and Human Development website and will be emailed to all students via the School Psychology listserv.

Financial Aid

The Financial Aid & Scholarship Office (<https://www.ucdenver.edu/tuition-cost/financial-aid>; 303-315-5969) administers federal, state, and institutional financial aid programs. These programs are designed to supplement a student's resources in meeting the expenses of acquiring a college degree. To be considered for financial aid, students must either be U.S. citizens or be eligible non-citizens. The assistance may include scholarships, grants, loans, and/or work-study. Financial aid is limited to students enrolled in degree programs.

Students receiving financial aid must meet the Satisfactory Progress Policy for Financial Aid by completing a specified number of credit hours each term and maintaining a minimum cumulative grade-point average. Graduate students must complete 5 hours per semester in Fall and Spring and 3 hours per semester in Summer. Finally, there is a maximum limit to the number of terms a student may receive financial aid.

The following types of financial aid are available to graduate students:

• Scholarships: Information on privately funded scholarships is available from the Auraria Library and the CU Denver Scholarship Office. In addition, the SEHD offers scholarships. These scholarship opportunities will be disseminated to students when they become available. Students can view scholarships for which they are eligible in their student portal.
• Grants: The Colorado Graduate Grant is based on financial need and available for the Fall and Spring semesters. Summer semester disbursement is dependent on remaining funds.
• Loans: There are three different types of loans available for graduate students: the Perkins, the Stafford, and the Supplemental Loan for Students (SLS). All loan repayments begin six months after the student ceases part-time enrollment.
• Work Study: Part-time positions may be available (15 - 20 hours/week) both on and off campus. Off-campus positions must be with non-profit organizations. There are no full-time positions available.
• Short-term Emergency Loan Assistance: Short-term loans are available within four to five working days to students in need. Repayment is due 30 days after receipt of the loan.

Mental Health and Counseling Resources

CU Denver Student and Community Counseling Center

The CU Denver Student and Community Counseling Center (<https://www.ucdenver.edu/counseling-center>) provides mental health counseling services to CU Denver Students as well as the Denver Metro community. CU Denver students receive counseling sessions at no cost as part of student fees. Students are able to attend free, unlimited groups offered each semester.

Regis University training clinic (RCCFT)

Because both SPSY and Counseling students complete practica at the Counseling Center and may also seek services there, CU Denver and the Regis University Counseling Programs have established a reciprocal agreement to avoid conflicts of interest. Under this arrangement, CU Denver students may receive Individual, Couple, and Family counseling services at the Regis University training clinic (RCCFT), and Regis University students may receive counseling services through the CU Denver Student & Community Counseling Center. All services are free of charge.

Students interested in accessing counseling services at Regis within the RCCFT can visit their new website at <https://www.regis.edu/about/regis-in-the-community/center-for-counseling-family-therapy/> and complete the Request an Appointment form. In the “Is there anything else we should know” box, please list that you are a CU Denver **COUNSELING** student. You can also call them at 303.964.5786 or email them at macplab@regis.edu. Be sure to mention you are a CU Denver COUNSELING student in your email as well.

While SPSY does not require students to seek counseling as part of program requirements, there are a number of resources beyond the CU Denver Counseling Center and Regis that offer affordable mental health support:

- **Maria Droste Counseling Center**, 1355 S. Colorado Blvd Ste. C-100, Denver, CO 80222, 303-756-9052, <http://www.mariadroste.org/>
Fees are associated with the level of expertise of the counselor. Has interns through licensed practitioners available.
- **Flourish Counseling**, W. 38th Ave, Denver, CO 80211, 303.455.3767, <http://flourishcounseling.com/>
Fees are associated with the level of expertise of the counselor. Has interns through licensed practitioners available and offers scholarships for those who would not otherwise be able to access a private psychotherapist.
- **Denver Family Institute**, 303-756-3340, www.denverfamilyinstitute.org
7200 East Hampden Avenue, Suite 301, Denver, 80024 Also 4891 Independence Ave., Suite 165, Wheatridge, CO 80333 (I70 and Kipling)
Counseling for Children, Adolescents, families, couples, and Individuals.
Sliding-scale fee based on ability to pay: \$15 - \$50 for a 50-minute session. No insurance. Accepts only cash or check
- **People House**, 303-480-5130, 3035 W 25th Ave, Denver, CO 80211, www.peoplehouse.org
Counseling for Spiritual and Personal growth, depression, anxiety, anger, grief, self-esteem, relationships, trauma recovery, sexual abuse, substance addiction, eating disorders, career counseling, and conflict resolution.
Educational classes, workshops, and groups are also offered. Sliding scale: Intern \$15-\$40 or senior professionals \$45- \$125
- **Professional Psychology Ctr. At University of Denver**, 303-871-3626, 2460 Vine St., Denver, CO 80208
<http://www.du.edu/professional-psychology-center/index.html>
Child, Adolescent, Family/Couples, Adult counseling, Testing, Court-ordered evaluations, Psychiatrist available for established clients. Sliding Scale fee of \$10-50 a session

- **Shepherds Gate Counseling Services at Denver Seminary**, 303-762-6987, 6399 S. Santa Fe Drive, Littleton, CO 80120
www.denverseminary.edu/friend/index.php
Training program for graduate students. Serve clients without major mental illnesses. Treating adults, adolescents, children, families. Sliding scale from free to \$15 per session based on household income; No insurance accepted.
- **Open Path Collective**, <https://openpathcollective.org/>
Low cost option designed for those without insurance or those with insurance that does not fully cover mental health services. One-time “lifetime” fee gets you access to private practice providers who provide individual therapy for \$30-60 a session and couples/family therapy for \$30-80 a session.

Chapter 3: Program Information and Policies

Each student is assigned a faculty advisor upon acceptance to the Doctor of Psychology degree program in School Psychology. Working together, the student and advisor will develop a plan of study based on the student's prior academic program(s), experience, specific interests, and the program requirements. Successful completion of all requirements for the PsyD degree requires a minimum of 100 graduate semester hours, including 75 credit hours of coursework, 7 credit hours of practica (500+ hours in the field), 6 credit hours of externship (500 clock hours in the field), 8 credit hours of internship (≥ 1500 clock hours in the field), and 4 capstone project credit hours.

Advising Notes

Your graduate program will keep you busy. There are many things to learn and quite a few tasks and responsibilities for you to keep track of. You are expected to be responsible for deadlines, required forms/paperwork, etc. We recommend that you keep a folder with all of your transcripts, your program advising sheets, and notes from each advising session. Make sure to update your address and/or phone number(s) in your UCDAccess student portal when changes occur. Students will automatically receive an email account when they become a student at the University of Colorado Denver. This email address is the official means of communication; other email addresses will not be used. Although we try to post important dates on listservs and announce them in classes, make sure you also monitor your own timelines (e.g., graduation paperwork, comps due dates), so you aren't delayed in your program. Use a yearly program planner to track your progress and consult your advisor regularly.

Your professional development should be demonstrated through appropriate dress, attitudes, promptness, and the quality of your written work. Be insightful about your own agenda, needs, and motivations so that you can structure your professional life to meet the high standards of the School Psychology program as well as your own. If you need special accommodations for your written, verbal, or quantitative tasks, please let your advisor know early in your program. Also note that two services are available on campus. The Learning Resource Center (<https://www.ucdenver.edu/learning-resources-center/tutoring>; 303-315-3531) can support students in study skills, English as a new language, tutoring, etc. The Disability Resources and Services Office (<https://www.ucdenver.edu/offices/disability-resources-and-services>; 303-315-3510) can provide qualified students with disability accommodations such as priority registration, assistance in note-taking, alternative testing, etc. You will also be expected to inform your instructors if you need accommodations.

Program Requirements Checklist (note that this is not an exhaustive list)

- _____ A. Read the School Psychology Program Handbook prior to your first individual advising session. At this time, you are expected to sign the Student Responsibility Contract (see Appendix A) to indicate your knowledge of program policies, procedures, and requirements. Your advisor will maintain this contract.
- _____ B. In conversation with your advisor, complete the paperwork to substitute coursework or transfer graduate credits into the PsyD program as part of your annual review of your first year in the program, if applicable
- _____ C. Meet with your advisor each semester or more often as needed.
- _____ D. Complete the Annual Student Self-Report Review form and upload it into Student Learning and Licensure each spring semester.
- _____ E. Pass comprehensive exams during the first semester of your third year in the program.
- _____ F. In the year prior to your internship, interview for and secure an intern position.
- _____ G. Obtain an Intern Authorization/License through your university intern supervisor and turn into CDE (required for internships in Colorado public schools).
- _____ H. Upon completion of your internship and courses, apply for graduation in the first couple of weeks of the semester you plan to graduate. Your capstone project must be submitted to ProQuest by the posted deadline. Your Professional Practice Case Study is due by March 1 (see Chapter 5).

Substituting Prior Graduate Work for Program Requirements

Students who have completed graduate degrees in related fields before entering the program have often fulfilled some of the SPSY course requirements. Accordingly, they may request that a course requirement be waived or transferred for their program. Waived courses are NOT considered part of your program and do not “count” toward your degree; as such, students must take a “substitute” course to make up the credit hours. Courses that are transferred in appear on your transcript. For students pursuing a PsyD degree, if you have a master’s degree in a related field, you must take a minimum of 50 credit hours here at CU Denver. If you do not have your master’s, a maximum of 9 credits may be transferred.

Transfer requests are most likely to be approved if: (a) the student has successfully completed a very similar course and can document that the course content was essentially the same as the course required for licensure; (b) the course was for graduate credit; (c) the course was completed within the past seven years; and (d) the student earned a grade of **B** or better in the course. Courses graded as Pass/Fail cannot be transferred in. Exceptions to these requirements may be made on a case-by-case basis, as described in the Graduate Education Office policy.

To apply for a course transfer, students need to complete the Request for Course Transfer form available on the SEHD website: <https://education.ucdenver.edu/academic-services/student-resources/graduate>.

In some cases, the student may be asked to provide course syllabi and/or demonstrate their knowledge of the course content by completing a special project or the course's final examination. Your advisor will determine which courses are approved for transfer in collaboration with other faculty in the School Psychology Program and the School of Education & Human Development. Copies of all approved transfers will be kept in the student's personal records, as they will not appear on the official transcript.

Note: Not all requests for course transfers are approved. Requests are only approved when they have been documented, to the satisfaction of both your advisor and course instructor, that all course content has been reviewed and mastered.

NOTE: Transfer requests should be submitted to your faculty advisor as part of the annual review process your first academic year in the program.

SPSY Required Coursework

REQUIRED COURSEWORK FOR DOCTOR OF PSYCHOLOGY DEGREE IN SCHOOL PSYCHOLOGY			
Course	Course Description	Credits	Prerequisite for:
RSEM 5100 Basic Statistics	A first-level course on the use and interpretation of descriptive and inferential statistics. Topics covered include frequency distributions, measures of central tendency and measures of variability; shapes of distributions; standard scores; scattergrams, correlation and regression; and t-tests.	3	RSEM 7110
RSEM 5110 Introduction to Measurement	This introductory graduate-level course examines the theoretical and historical foundations of psychological measurement and its applications in education, counseling, and related fields. Particular attention is given to concepts of reliability, validity, norms, response sets and response styles, fairness and bias, and norm-referenced vs. criterion-referenced measurement.	3	-
RSEM 7080 Methods of Qualitative Inquiry	Prepares graduate students to conduct field research employing qualitative methods and perspectives. Students become familiar with evolving theoretical and methodological perspectives in qualitative research drawn from anthropology, clinical psychology, etc.	3	-

REQUIRED COURSEWORK FOR DOCTOR OF PSYCHOLOGY DEGREE IN SCHOOL PSYCHOLOGY

Course	Course Description	Credits	Prerequisite for:
RSEM 7050 Methods of Survey Research	Covers the purposes and methods of survey research. Topics include: goals and uses of survey research; data collection methods; questionnaire and interview protocol design; reliability and validity of data collection methods; sampling; and ways to reduce bias.	3	SPSY 6700
RSEM 7110 Intermediate Statistics	Builds upon basic statistics covering more advanced methods of analyzing data with an emphasis on the use and interpretation of inferential techniques. Topics covered include one-way and two-way analysis of variance, power, multiple comparisons, factorial designs and factorial ANOVA, partial correlation, multiple correlation and regression, ANCOVA, and the selected use of packaged statistical programs (SPSS).	3	SPSY 6700 (can be taken concurrently)
SPSY 5010 Theoretical and Historical Influences in School Psychology	Provides an overview of the history of psychology, including the dark side of psychology and its contributions to colonization and inequities. The course also covers a range of counseling and psychological theories applicable to school psychologists, children, and educational contexts, with an emphasis on socio-cultural contexts. Consideration is also given to the influence of history and theory on school psychological practice.	3	SPSY 6911
SPSY 5900 Examining Identity, Power, and Privilege in Educational and Mental Health Contexts	The course is designed to foster students' understanding and appreciation of diverse identities within school psychology practice, educational and mental health contexts, and policy. This course will focus on advancing an understanding of integral concepts such as identity, power, privilege, race, ethnicity, gender, and socioeconomic status.	3	SPSY 6930

REQUIRED COURSEWORK FOR DOCTOR OF PSYCHOLOGY DEGREE IN SCHOOL PSYCHOLOGY

Course	Course Description	Credits	Prerequisite for:
SPSY 6000 Learning and Affective Aspects of Behavior in School Psychology and Education	Reviews theories of learning and affect pertinent for school psychologists and explores their roles in human functioning, with a particular focus on children and educational and varying socio-cultural contexts.	3	SPSY 6150
SPSY 6100 Practicum 1 - Professional & Legal Foundations in School Psychology Prerequisite: Admission to SPSY program	A seminar course in current topics related to the practice of school psychology, both past and present, including timely legal, ethical & professional and ethical issues, and new strategies for the delivery of school psychological services. Includes a field experience requirement.	3	SPSY 6150
SPSY 6120 School Psychology Foundations II - Applications Prerequisite: SPSY 6100	A seminar course that covers the application of legal and ethical practice in school psychology. Topics include developing an ethical mindset, landmark court cases, understanding legally compliant special education practices, legal and ethical decision making, and applying these ideas to school-based settings.	3	
SPSY 6150 Psychoeducational Assessment I Prerequisites: RSEM 5110 or equivalent.	This course focuses on the psychoeducational assessment of cognitive development in children and adolescents. Primary emphasis is directed toward cognitive/intellectual evaluation in clinical and school settings. Topics include the selection, administration, and interpretation of individual ability tests; and introduction to psychological report writing, and historical, theoretical, and psychometric issues with intelligence. Test administration is required.	3	SPSY 6160 SPSY 6911

REQUIRED COURSEWORK FOR DOCTOR OF PSYCHOLOGY DEGREE IN SCHOOL PSYCHOLOGY

Course	Course Description	Credits	Prerequisite for:
SPSY 6160 Psychoeducational Assessment II Prerequisites: LDFS 6200 or equivalent, SPSY 6150.	In-depth study of the major techniques of formal and informal assessment and their applicability to problems found in psychoeducational settings. Administration and interpretation of special ability, personality, and achievement tests, with attention to case study integration, are required.	3	SPSY 6911
SPSY 6170 Early Childhood Systems and Assessment Prerequisites: SPSY 6510, SPSY 6150, 6911 (can be concurrent)	Examines theories and research in developmental psychology to provide a foundation for clinical services to children and families in applied settings. Includes coverage of developmental assessments and services for infants/toddlers.	3	SPSY 6911 (can be taken concurrently)
SPSY 6350 School-Based Interventions: Children, Youth & Families Prerequisite: SPSY 5010	Provides a theoretical and practice-oriented introduction to theories of personality and child counseling in schools. It weaves together skills and techniques essential to the theory and practice of psychotherapy. Course activities will complement the systemic group-based interventions examined in SPSY 6400.	3	SPSY 6911 (can be taken concurrently)
SPSY 6400 School-Based Interventions: Groups, Classrooms, Systems Prerequisites: SPSY 6350	This course provides students with advanced study of research on and techniques of school psychological interventions, whole classroom and small group intervention strategies, and systemic, school-wide interventions. Also includes instruction on the evaluation of intervention effectiveness.	3	SPSY 6930
SPSY 6410 Psychoeducational Assessment of Culturally and Linguistically Diverse Students Prerequisite: SPSY 6150	Prepares students to provide current best practices in cognitive assessment and psychotherapeutic services for students who are linguistically diverse. Attention will be paid to differentiating between students with language disorders and students in the process of acquiring English as a second language. Service recommendations will be grounded in an understanding of the unique psychological and educational needs of linguistically diverse students, as	3	SPSY 6911

REQUIRED COURSEWORK FOR DOCTOR OF PSYCHOLOGY DEGREE IN SCHOOL PSYCHOLOGY

Course	Course Description	Credits	Prerequisite for:
	well as the legal and ethical standards governing their education.		
SPSY 6420 Crisis Prevention, Planning, and Intervention	Introduces students to crisis theory, prevention research, and intervention strategies. The course is designed for school mental health professionals interested in developing advanced crisis counseling and intervention skills sufficient for use in school settings. The course emphasizes the importance of practical hands-on opportunities for skills development.	3	SPSY 6911
SPSY 6450 Consultation and Data- Based Decision-Making	This course covers a wide range of traditional and emerging consultation models emphasizing practical application of empirically-supported approaches to advance the social & academic competence of students, classrooms & schools. Hands-on consultation experiences will supplement the course content as students practice and refine their consultation skills. In-class review of videotaped consultation sessions will be utilized.	3	SPSY 6930
SPSY 6500 Case Conceptualization and Diagnosis	This course assists students in designing client-centered, individualized and culturally sound treatment plans for a wide variety of clinical mental health disorders. Course content will include a strong focus on the diagnosis of mental health disorders based on criteria from the DSM-5, and the subsequent treatment planning and provision of evidence based clinical care.	3	SPSY 6917
SPSY 6510 Typical and Atypical Development and Mental Health and Wellbeing	This course covers theories, research, and key social-cultural concepts in typical and atypical child and adolescent development (including Autism, ADHD, etc.) pertinent to the field of school psychology.	3	SPSY 6170
SPSY 6550 Academic & Behavioral Interventions in School Psychology Prerequisites: SPSY 6150	Provides training in knowledge and skills for the use of educational intervention practices in school psychology, including the development, implementation, and evaluation of academic and behavioral interventions; curriculum-based measurement and progress monitoring.	3	SPSY 6150

REQUIRED COURSEWORK FOR DOCTOR OF PSYCHOLOGY DEGREE IN SCHOOL PSYCHOLOGY

Course	Course Description	Credits	Prerequisite for:
SPSY 6600: Social Influences on Development, Behavior, and Well Being for School Psychologists Prerequisite: Admission to the School Psychology PsyD program or permission of instructor.	Examines processes that occur both within and outside ourselves as we interact with others in a complex social world, with an emphasis on educational contexts. Topics covered include social attitudes, self-concept, prosocial and antisocial behavior, stereotyping, prejudice, and bias.	3	-
SPSY 6700 Advanced Seminar in School Psychology Prerequisite: SPSY 6911	Designed for students beginning doctoral work, explores conceptual and practical bases for doing and evaluating educational research. The chain of reasoning linking the conceptualization of a research problem, the posing of questions in a social process	3	SPSY 6930 SPSY 8980
SPSY 7500 Biological and Neuropsychological Bases of Behavior Prerequisite: SPSY 6150; SPSY 5600	Examines the biological basis of behavior emphasizing the relationship between the functions and structures of the brain including neuroanatomy, brain development, neurophysiology, neurochemistry, and psychopharmacology; and neuropsychological assessment principles.	3	-
SPSY 7980 Clinical Supervision and Administration of Psychological Services	This course prepares school psychologists to function in supervisory and administrative capacities in delivering mental health services in schools and other settings. Students will develop an understanding of the current body of knowledge related to clinical supervision including theories, models, and techniques. Students will also develop knowledge and skills to be prepared for administrative roles, as well as an understanding of relevant organizations from a systems perspective.	3	SPSY 6918

REQUIRED COURSEWORK FOR DOCTOR OF PSYCHOLOGY DEGREE IN SCHOOL PSYCHOLOGY

Course	Course Description	Credits	Prerequisite for:
SPSY 6911 School Psychology Practicum (500 Clock Hours) Prerequisites: SPSY 5600, SPSY 6100, SPSY 6150, SPSY 6160, SPSY 6300 and consent of instructor.	The School Psychology practicum allows students to integrate theory with school psychological practice. Students apply a set of discrete skills in the actual school setting under the supervision of a licensed School Psychologist.	6	SPSY 6930
SPSY 6917 Advanced Practicum in Psychological Assessment Prerequisites: SPSY 6100, SPSY 6150, SPSY 6160, and consent of instructor	Provide psychological assessment services to clients at the CU Denver Counseling Center under faculty supervision.	1	SPSY 6930
SPSY 6918 Clinical Externship (500 clock hours)	Supervised practice in providing comprehensive psychological services to children, youth, and families in grades. Students are placed in clinical settings and supervised by practicing, licensed psychologists or school psychologists.	6	SPSY 6911
SPSY 6930 School Psychology Internship (1500 Clock Hours) Prerequisites: SPSY 6911, SPSY 6217, SPSY 6918, instructor consent. Students must also have passed comprehensive exam	The internship stresses the professional practice of School Psychology. Students complete 1500 clock hours of School Psychological under supervision. At least 600 hours of internship must be completed in a school setting.	8	-

REQUIRED COURSEWORK FOR DOCTOR OF PSYCHOLOGY DEGREE IN SCHOOL PSYCHOLOGY

Course	Course Description	Credits	Prerequisite for:
SPSY 8980 Capstone Project	The Capstone Project is a culminating component of the program. Production of a scholarly project that illustrates the student's understanding of relevant topics in school psychology, the scope of contemporary practice, and the various roles of the professional school psychologist.	4	-

School Psychology PsyD (100 Credit Hours)

COURSE NUMBER	TITLE
RSEM 5100	Basic Statistics
RSEM 5110	Introduction to Measurement

EXAMPLE Course Sequence

Year 1 (30 credits)

Fall	Spring	Summer
RSEM 5110 (3)	RSEM 5100 (3)	SPSY 6420 (3)
SPSY 5010 (3)	SPSY 5900 (3)	
SPSY 6000 (3)	SPSY 6160 (3)	
SPSY 6100 (3)	SPSY 6510 (3)	
SPSY 6150 (3)		

Year 2 (31 credits)

Fall	Spring	Summer
SPSY 6120 (3)	SPSY 6400 (3)	SPSY 6917 (1) <i>can also be taken fall or spring of 2nd year</i>
SPSY 6350 (3)	SPSY 6410 (3)	SPSY 6170 (3)
SPSY 6450 (3)	SPSY 6550 (3)	RSEM 7050 (3)
SPSY 6911 (3)	SPSY 6911 (3)	

YEAR 3 (27 credits)

Fall	Spring	Summer
SPSY 6918 (3)	SPSY 6918 (3)	SPSY 7980 (3)
SPSY 6500 (3)	SPSY 6600 (3)	
SPSY 6700 (3)	SPSY 7500 (3)	
RSEM 7110 (3)	RSEM 7210 (3)	

YEAR 4 (12 credits)

Fall	Spring	Summer
SPSY 6930 - Internship (4)	SPSY 6930 - Internship (4)	SPSY 6930 – Internship <i>(depends on internship site)</i>
SPSY 8980 – Capstone Project (2)	SPSY 8980 – Capstone Project (2)	

SAMPLE SCHEDULE

<u>Year 1</u>		
<i>Semester 1</i>	<i>Semester 2</i>	<i>Summer</i>
Introduction to Measurement	Psychoeducational Assessment II	Crisis Prevention, Intervention & Planning
Prac I - Professional & Legal Foundations in School Psychology	Typical and Atypical Development and Mental Health and Wellbeing	
Theoretical and Historical Influences in School Psychology	Multicultural Interventions	
Psychoeducational Assessment I	Basic Statistics	
Learning and Affective Aspects of Behavior in School Psychology and Education		
<u>Year 2</u>		
<i>Semester 1</i>	<i>Semester 2</i>	<i>Summer</i>
School Psychology Practicum/Practicum II	School Psychology Practicum	Early Childhood Systems and Assessment
School-Based Interventions: Children, Youth, and Families	School-Based Interventions: Groups, Classrooms, and Systems	Methods of Survey Research
Applications of Legal and Ethical Practice in School Psychology	Academic and Behavioral Interventions	Advanced Assessment Practicum (<i>may be fall or spring of 2nd year</i>)
Consultation and Data-based Decision-making	Psychoeducational Assessment of Culturally and Linguistically Students	
<u>Year 3</u>		
<i>Semester 1</i>	<i>Semester 2</i>	<i>Summer</i>
Clinical Externship	Clinical Externship	Clinical Supervision & Administration of Psych Services
Case Conceptualization and Diagnosis	Methods of Qualitative Inquiry	
Intermediate Statistics	Biological & Neuropsychological	

	Bases	
Adv. Seminar in School Psychology	Social Psychology for School Psychologists	
Year 4		
<i>Semester 1</i>	<i>Semester 2</i>	<i>Summer</i>
Internship	Internship	Internship (<i>depends on internship site</i>)
Capstone Project	Capstone Project	

*Note: Summer Classes are typically offered during the day.

*Note: SPSY 6917 can be taken any semester once prerequisites have been met and should be taken during the 2nd year (summer-spring).

Required Master's Degree in School Psychology en route to PsyD

All students who do not already have a graduate degree in school psychology will obtain a Master of Arts (M.A.) degree in School Psychology while pursuing the PsyD. Requirements for the M.A. include completion of at least 60 credit hours in the PsyD program and a passing score on the comprehensive exam. There are no costs or other requirements to complete the M.A.

This M.A. can be beneficial to certain internship and externship sites in particular. Please reach out to your advisor with any questions about the M.A. in School Psychology requirement.

Early in the semester, in which students will complete at least 60 credits and take the comprehensive exam, students must apply for graduation (degree conferral) with the M.A. via their UCDAccess student portal no later than the Census Date (available on the [Academic Calendar](#)), which is typically around the first of September. Please note that students will only be allowed to participate in the commencement ceremony when they complete the PsyD.

Grading Policies and Grade Appeals

Within the School of Education & Human Development (SEHD), the grading system includes the following letter grades and grades for incomplete work.

A	= Superior/Excellent: 4 credit points per credit hour
A-	= 3.7 credit points per credit hour
B+	= 3.3 credit points per credit hour
B	= Good/Better than Average: 3 credit points per credit hour
B-	= 2.7 credit points per credit hour
C+	= 2.3 credit points per credit hour
C	= Average: 2.0 credit points per credit hour.
C-	= According to School of Education policy a grade of C- or below cannot be applied toward requirements of a graduate program
D+, D, D-	= Grades of D may be assigned but do not count for credit
F	= Failing
W	= Withdrawal from course after Census Date
I	= Incomplete. If a grade of I is not resolved within 1 calendar year, the grade automatically becomes an F

An Incomplete ("I" grade) is approved only when students, for reasons beyond their control, have been unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given. The instructor who assigns an "I" sets the conditions under which the coursework can be completed and the time limit for its completion. The student is expected to complete the requirements within the established deadline and not retake the entire course. At the end of one year, "I" grades for courses that are not completed or repeated are changed to an "F". The Application for Incomplete Grade is available at <https://education.ucdenver.edu/academic-services/student-resources/graduate>.

Grade point averages are calculated by multiplying each course's credit hours by the points for the letter grade, summing all the credit points, and dividing by the total semester hours. Pass grades and no-credit courses are not included in your GPA. Graduate students must maintain a 3.0 GPA to remain in good standing. Students whose GPA falls below a 3.0 are subject to academic probation or suspension. In addition, school psychology students must obtain a grade of B- or better in all required school psychology courses, or the course must be repeated. A grade below a B- in any course will result in that course not counting toward the PsyD degree, and the student may need to take additional coursework to make up for it.

Students wishing to appeal a grade should follow the SEHD student appeals procedure, summarized in [Appendix C](#). Students wishing to make other appeals, including appealing dismissal from the program, should follow university procedures, summarized in [Appendix R](#) of this handbook.

SPSY Late Work Policy

Assignments submitted after the deadline are generally not accepted unless a student has extenuating circumstances that have been discussed with the instructor in advance (for example, a serious illness or the death of a family member). Individual instructors may outline additional expectations or exceptions in their course syllabus. Please note that late work, when accepted, may result in a lower course grade.

Personal/Professional Dispositions

In addition to completing the educational requirements and practitioner competencies necessary for licensure in School Psychology, students' personal and professional characteristics are evaluated annually as part of the Student Progress Review. This review incorporates the Personal/Professional Dispositions Rating Form (see Appendix D), which assesses adaptability, communication skills, conscientiousness, cooperation, independence, productivity, professional ethics, conflict-management skills, and sensitivity to diversity.

At the end of each semester, instructors receive the rating form and are asked to complete it only for students who have demonstrated notable concerns or exceptional strengths. Students also complete a self-assessment using the same form as part of the Annual Student Progress Review. Program faculty may provide additional informal feedback throughout the year or use the form as needed.

Because the dispositions rating is embedded in the practicum and externship evaluations, all students are reassessed during these field experiences. If concerns arise at any point, students will receive timely feedback and meet with their advisor to develop a targeted support plan.

Annual Student Progress Review

During each spring semester, School Psychology students will be asked to participate in an annual review of their progress in the program. This review will require students to complete a personal progress evaluation (See [Appendix D](#)). After receiving a student's evaluation, the student's faculty advisor will review the student's self-evaluation and will rate the overall progress of the student in the program. Student progress will be evaluated based on faculty feedback of class performance, progress towards graduation, involvement in professional development opportunities, and examination of personal characteristics and feedback from all course instructors. After the faculty review of the data, students will receive a summary form of their annual review (See [Appendix D](#)).

Student Review and Retention Policy

Successful completion of a program of study in School Psychology is based on demonstrating effectiveness in academic, professional, and personal areas as they relate to a student's professional objectives. The faculty of the School Psychology program has a professional responsibility to evaluate these aspects of students in the training program.

If, in the professional judgment of the program faculty, a student's behavior is deemed substandard, unethical, illegal, and/or professionally unbecoming at any time during the course of training (including coursework, practica, externship, and internships), the following actions may be taken:

1. **Remediation**: The student will be placed on a remediation plan that will be developed by the student and the advisor, with the approval of other necessary School Psychology faculty.
2. **Voluntary Resignation**: Recommend the student resign from the program.
3. **Dismissal from the Program**: If a student has failed to attain the behavioral goals specified in his or her remediation plan, and there is no expectation that the student can reasonably attain them in the near future, a recommendation of dismissal from the program will be made.
4. **Immediate Dismissal**: If a student's unacceptable professional and personal behaviors are deemed severe enough by the program faculty, an immediate dismissal recommendation will be made without opportunity for a remediation plan.

TEE Licensure and Student Employment in School Psychology

Students who engage in and receive remuneration for school psychological services before being certified/licensed and/or cleared for internship will be considered by faculty to be engaging in unethical behavior. Any student wishing to pursue employment as a school psychologist must petition the faculty before accepting employment. Under no circumstances will students who have not completed SPSY 6911 School Psychology Practicum be allowed to accept employment as a School Psychologist and/or obtain a Temporary Educator Eligibility Authorization (TEE) for

such employment.

Licensure as a School Psychologist

The PsyD in School Psychology program at CU Denver prepares students for licensure as school psychologists through the Colorado Department of Education (CDE). To obtain this license, graduates must meet the requirements outlined by the CDE (<https://www.cde.state.co.us/cdeprof/checklist-initialspecialserviceprovider>; <http://www.dora.state.co.us/>). This includes earning a graduate degree in school psychology, completing a practicum and an internship, and passing the national school psychology exam.

Licensure as a Psychologist

The PsyD in School Psychology program at CU Denver prepares students for licensure as psychologists through the Colorado Department of Regulatory Agencies (DORA) State Board of Psychologist Examiners. To obtain this license, graduates must meet the requirements outlined by DORA (<http://www.dora.state.co.us/>). Once the doctoral degree in school psychology has been earned, graduates can apply to DORA to become a licensed psychologist. This process requires additional hours of post-doctorate supervised practice and a passing score on the Examination for the Profession Practice of Psychology (EPPP). Additionally, the candidate must pass a state jurisprudence exam.

National Certification in School Psychology (NCSP)

National Certification in School Psychology (NCSP) is administered by the National School Psychology Certification Board (NSPCB), a division of the National Association of School Psychology. Requirements include completion of a NASP-approved program in School Psychology or its equivalent, completion of a 1,500-hour internship in School Psychology, and a passing score on the School Psychology specialty area test administered by *Praxis*®.

Although the NCSP is not required for Colorado licensure in School Psychology, it may be advantageous for both students who remain in Colorado and those who eventually want to work as School Psychologists in other states. In Colorado, school psychologists with the NCSP are eligible for a stipend through the Colorado Department of Education. Moreover, national certification requirements have established a national standard for professional preparation in School Psychology, and holding the NCSP identifies a student as having met that standard. School districts recruiting from out of state are better able to assess a student's training when the student has satisfied these national criteria. Thirty-three states automatically grant state licensure to nationally licensed School Psychologists, and other states have modeled their licensure requirements after the national licensure. As such, the NCSP often makes it much easier to obtain the school psychologist credential in other states.

Maintaining a credentials file

Students are advised to maintain a personal credentials file documenting their professional training, including:

☒ Course syllabi for all graduate courses

☒	Course transfer documentation for any transfer requests
☒	Written plan, hours log, and final evaluation for all internship/practicum/externship placements
☒	Comprehensive exam and case study evaluation forms

SEHD policy requires that all student files be purged five years after a student graduates. Without personal records, students could find it difficult to document their professional training to any State Department of Education, licensing board, or professional credentialing agency. At a minimum, students should keep copies of syllabi and practicum, externship, and internship logs.

Leave of Absence

Students who need to leave the PsyD program in School Psychology for a period of time should determine, in consultation with their faculty advisor and Program Director, whether a petition for leave of absence is required for up to one (1) year. Approved leaves of absence do not automatically extend the time limits for earning a degree or certificate, but they may be cited as supporting documentation when requesting an extension, if needed. Requests for leaves of absence that exceed one (1) year will not be approved unless the Program Director provides the Dean with a compelling justification for such action. Students who are absent for longer than one (1) year will be considered to have withdrawn from the Program and will be required to reapply for admission. Students who discontinue coursework for more than a year without arranging a leave of absence will need to reapply to the program, competing with all other new applicants. The Request for Leave of Absence can be found at <https://graduateschool.ucdenver.edu/forms-resources/resources>.

Chapter 4: Supervised Experiences

Requirements for licensure in School Psychology include a minimum of 2500 hours of supervised experience, including 7 graduate semester hours of supervised practicum (500+ hours), 6 graduate semester hours of externship (500 clock hours), and an 8 graduate semester hour internship (1500 clock hours). The practicum in School Psychology is intended to be the first opportunity for students to practice school psychological skills in an applied setting under the supervision of a licensed, practicing School Psychologist and the university practicum supervisor. The Advanced Practicum in Psychological Assessment is supervised by a licensed psychologist and provides students with the opportunity to complete at least one comprehensive psychological evaluation of a Training Clinic client. Externship involves supervised practice in providing comprehensive psychological services to children, youth, and families in clinical settings and is supervised by practicing mental health providers, licensed psychologists, or school psychologists. The internship in School Psychology is intended to provide students with an opportunity to progressively assume the professional role of a School Psychologist under supervision. Interns spend $\geq 1,500$ clock hours practicing as School Psychologists under the supervision of a licensed psychologist. The practica, externships, and internships provide opportunities for students to integrate discrete skills acquired through academic coursework to address real problems in real-world settings.

General Guidelines for Supervised Experiences

Responsibilities of the Student. Students who enter supervised experiences as part of their university training program practice under the licensure and authority of their Site and University Supervisors. It is imperative that the student's work never threatens the integrity of the supervisors' credentials. To ensure that this is the case, students are expected to meet the following responsibilities:

- | |
|--|
| 1. Students will maintain a standard of professional behavior that includes being prepared, punctual, accurate, appropriately maintaining client records and materials, maintaining a professional appearance while in the field setting, respecting the legal and ethical confidentiality of clients and colleagues, and utilizing appropriate sensitivity and concern with colleagues. |
| 2. Students will assume primary responsibility for developing and monitoring the practicum or internship written plan governing their supervised experience. All practicum and internship plans should be approved by the site and university supervisors and submitted within 2 weeks after the start of the placement. |
| 3. Students will meet with Site and University Supervisors as required. |
| 4. Students will attend supervisory meetings with the University Supervisor as scheduled during the term for supervision and to review the placement experience. |
| 5. Students will maintain an accurate log of all hours spent in placement-related activities, review this log with the on-site supervisor at appropriate times, and submit this log to the university supervisor monthly. (See Appendix E) |

6. Students will incorporate representative work products, after first blacking out or otherwise masking identifying information to preserve client confidentiality for case studies.
7. Students will sign all reports with a title that clearly represents their training status, such as “Practicum Student in School Psychology”, School Psychology Extern”, or “School Psychology Intern.” Reports of practicum students should always be co-signed by the supervising Psychologist/School Psychologist; in some cases, districts or agencies may also require interns' reports to be co-signed.
8. Students will follow the schedule of the school district/agency in which they complete their placement unless an alternative schedule is specified in their written plan. This includes starting the year when their supervisor does and staying until the end of the year. This also includes arriving when your supervisor does in the morning and staying until the end of the day, unless you are leaving for class or have pre-arranged with the site supervisor.
9. Students will participate actively in professional supervision, keeping their supervisors informed of all activities they engage in, including requesting additional supervision as required, participating in self-evaluation activities, and participating actively in group discussions that are held during regularly scheduled practicum or internship class meetings.
10. According to the University attorney, the extent of liability coverage for public employees in Colorado is \$150,000 per incident or \$400,000 for multiple incidents. Students are required to get their own malpractice insurance when enrolled in field experience classes (practicum, externship, and internship). This can be obtained at a fairly low cost through the National Association of School Psychologists or the American Psychological Association.

Responsibilities of the Site Supervisor. Practicing school psychologists, licensed mental health professionals, or psychologists who assume the role of supervisor for a student-in-training are committing to three different roles: (1) that of the student’s mentor, providing personal support and professional guidance as the student adapts to the professional demands of School Psychology; (2) that of the student’s critic, carefully evaluating the adequacy of the student’s skills and their suitability for the professional role of school psychologist and (3) that of the student’s instructor, providing direct instruction in skills that cannot be acquired outside of the applied setting or recommending additional instruction through the university program when that is appropriate. Satisfying these sometimes contradictory roles requires considerable reflection and careful decision-making. Specific responsibilities of the Supervisor include:

☐ Site Supervisors will review, critique, and contribute to the student’s written practicum or internship plan for the placement experience to ensure it realistically reflects the opportunities available to the student at the placement site.
☐ Site Supervisors will direct the implementation of the placement plan through case assignments, incorporating the student into ongoing site activities, and monitoring student participation in the supervisor’s own activities.

☐ Site Supervisors will supervise the student's daily activities by preparing the student for unfamiliar situations, guiding the student through new activities, and reviewing and discussing completed activities with the student.
☐ Site Supervisors will provide at least 2 hours of individual, face-to-face supervision per week, except when a student works fewer than 10 hours per week, in which case the supervisor should provide at least 1 hour of face-to-face supervision.
☐ Site Supervisors will immediately inform the University Supervisor of any student behavior that interferes with the student's effective professional practice in the placement site.
☐ Site Supervisors will evaluate the student's demonstrated skills through review, discussion, direct observation, feedback from other school personnel, and review the student's work products, including written reports, case notes, and related documents. As part of this evaluation, the Site Supervisor will complete a mid-placement and final written evaluation of the student's performance in the placement site.
☐ Site Supervisors will review the student's hours log, make modifications as needed, and attest to the accuracy of the final log.
☐ Site Supervisors will ensure that the student's practice is consistent with current legal-ethical guidelines of the profession, including the <u>NASP Principles for Professional Ethics</u> and <u>Ethical Conduct and Professional Practices</u> (NASP), and the <u>Ethical Principles of Psychologists and Code of Conduct</u> (APA).

Responsibilities of the University Supervisor. The ultimate responsibility for the student's training rests with the University Supervisor. The University Supervisor is responsible for the following:

☐ The University Supervisor will recruit placement sites and certify that these meet the program standards, as specified elsewhere in this manual.
☐ The University Supervisor will guide the assignment of students to placement sites and coordinate students' applications to Site Supervisors to establish placements.
☐ The University Supervisor will evaluate the adequacy of the student's practicum or internship plan for supervised experience, with consultation from the Site Supervisor as needed to assist with planning and evaluation.
☐ The University Supervisor will meet with the student and site supervisors as needed during the placement, at least 2 evaluative visits per year (start of the experience and an end-of-year site visit/evaluation).
☐ The University Supervisor will supplement the Site Supervision by directing class meetings of students.
☐ The University Supervisor will review the student's progress and is responsible for assigning the student's final grade for the placement.
☐ The University Supervisor will work to ensure that all of the student's supervised placements are coordinated so that they represent a diversity of experiences, with opportunities to address a broad spectrum of professional problems, with diverse children, and age ranges.

Log of contact hours. Students are expected to maintain a detailed electronic log of all the hours spent in the supervised experience. For each recorded date, the log should specify the number of hours spent in the supervised placement, the activities engaged in, and the nature and extent of any supervision received. Students may choose to use the **Time2Track hours-tracking tool** or another time-tracking tool to track field experience hours; however, these tools often have a fee. Students can also use the form provided in [Appendix E](#). The Site Supervisor will review the final log to attest to its accuracy. The placement is not considered complete until the reviewed log has been submitted to the University Supervisor.

A limited number of off-site activities may be included in the student's placement hours log. These include:

☐ Up to 10% of the total recorded hours may be spent in preparation for activities at the placement site, including scoring and interpreting test protocols, preparing materials or plans for individual or group interventions, writing reports or case notes, reading related to placement activities, and other preparatory activities deemed appropriate by the Site Supervisor.
☐ Up to 8 hours per day may be recorded for attending the Colorado Society of School Psychologists fall convention, the convention of the National Association of School

Psychologists, the APA Annual Convention, or similar conventions as approved by the University Supervisor.

- ☐ Actual clock hours may be recorded for the time spent in practicum, externship, or internship class meetings held with the University Supervisor. The student may not use these contact hours as supervision hours.

Practicum in School Psychology

Definition of Practicum. The practicum in School Psychology is a 6-credit semester-hour experience intended to prepare students for the diverse roles and responsibilities they will be asked to perform during the clinical externship and internship in School Psychology. A minimum of 500 clock hours of practicum must be completed over the course of the academic year. This averages about 2-3 days a week at the practicum site. Students must first complete prerequisite courses. The practicum provides students with their first opportunity to apply discrete school psychological skills in a school setting under the supervision of a practicing school psychologist and the university practicum supervisor.

Prerequisite Courses for the Practicum. School Psychology students must earn a grade of B- or better in the following prerequisite courses prior to enrolling in the practicum:

- SPSY 6100: Professional and Legal Issues in School Psychology
- SPSY 6150: Psychoeducational Assessment I
- SPSY 6160: Psychoeducational Assessment II
- SPSY 6420 Crisis Planning, Prevention, and Intervention
- SPSY 5900: Examining Identity, Power, and Privilege in Educational and Mental Health Contexts

If a student has had these courses at another institution and the credits were approved for transfer or waiver, the prerequisite courses are considered to be met.

Applying for the School Psychology Practicum (Practicum II)

Practicum application “season” typically happens in the late winter or early spring, once districts have completed internship placements. At that time, the university practicum supervisor reaches out to districts to determine whether they plan to take practicum students and the application process they plan on using. This information is then compiled and disseminated to students applying for practicum.

Students are typically advised to apply to approximately two districts, based on their training goals, professional needs, geography, etc. Both the university practicum supervisor and faculty advisors are available to support students in determining where to apply. Once students know where they will be applying, they need to follow the district’s process (as the university coordinator will relay, as mentioned above).

Most districts ask students to submit a letter of interest and a CV. Some districts may ask students to complete an informal interview before making decisions. Both the university supervisor and faculty advisors are available to support students in preparing and reviewing materials. Students are advised to consult with either their faculty advisor and/or the university supervisor before accepting or turning down offers. Once a student has accepted a placement, the district will ask them to complete the district HR process. Students also need to inform the university supervisor about their placement, their supervisor’s name, and their supervisor’s contact information. Students should ensure that they know how to reach their

supervisor and have a start plan before supervisors and students are out of contact for summer break. Students are expected to start practicum when the school district staff begin their year, which is often before the university is back in session.

Requirements for practicum settings

School Psychology practicum sites must provide appropriate school psychology experience and adequate supervision from a credentialed and experienced school psychologist. To provide appropriate school psychology experience, a site must be in a school setting. The primary role of the School Psychology student in all settings should be to provide preventive and remedial mental health services to preschool- or school-aged children and youth. Practicum settings should provide services to a diverse group of students, including those with and without disabilities, and to students from families of differing ethnic, cultural, and economic backgrounds.

Regular supervision must be available from a credentialed School Psychologist. The Site Supervisor should have been employed by the agency for a minimum of two years, and where an agency serves multiple sites, should have been serving the placement site for at least a year. Scheduling should permit the supervisor to provide two hours of face-to-face supervision per week or one hour of weekly face-to-face supervision for students spending less than 10 hours weekly at the placement site. The Site Supervisor should have the flexibility to schedule this supervision at a convenient time. If the site supervisor is not licensed as a psychologist, the university supervisor will be available to provide additional weekly supervision if needed.

Required Activities for Practicum

Practicum students are required to demonstrate that they have successfully practiced school psychological skills in an applied setting prior to beginning the internship. Specific objectives have been developed by the program faculty for the fulfillment of the School Psychology practicum. These objectives will be individually revised to meet the needs of each university, field supervisor, and student.

Practicum II students are expected to construct a role for themselves that meets the needs of their particular practicum site and is consistent with their previous experiences and their contemporary interests and concerns. The objectives below are intended to guide you in tailoring a meaningful, well-balanced practicum experience. Beyond such requirements and suggestions, it is your responsibility (with support from university and district supervisors) to construct a role that is unique and tailored to your professional needs and interests. In other words, the list below is not meant to describe all of the activities that will make up your Practicum II experience.

1. Observe the organization and administration of school settings. Examples include activities such as:
 - a. Attend faculty and/or other building staff meetings, as appropriate and/or necessary. You may do this regularly or occasionally.
 - b. Become familiar with the record-keeping procedures in your school(s) and how to facilitate the transfer of records between schools and/or districts.
 - c. Attend a district board meeting and/or Parent-Teacher Association meeting.
 - d. Attend special services/student services team meetings.
 - e. Attend pre-referral/child-study/care and concern meetings.
 - f. Participate in IEP meetings (student should move from attending to facilitating by the end of practicum), including sharing findings from an assessment that you conducted. This activity is required.
2. Multiple opportunities to conduct, score, and report comprehensive psychoeducational evaluations of cognitive abilities and social-emotional functioning, including the use of standardized assessment tools. There should be sufficient opportunity to practice to administer, score, and write up results with minimal errors.
 - a. Practicum students are required to complete at least one evaluation with a child who is a multilingual learner. **This activity is required as part of SPSY 6410.**
 - b. Ideally, assessments should represent a wide range of linguistic and cultural backgrounds and should present with a range from mild/moderate to severe cognitive and emotional/behavioral needs. Activities described above will most likely (though

certainly not always) occur in an integrated, holistic manner in which the needs of the whole child and their immersion in problem-situations are considered.

3. Conduct an assessment and intervention focused on social-emotional, behavioral, or academic functioning **(Required for SPSY 6550)**. This activity may take place in collaboration/consultation with another professional.

You should include the following activities:

- a. Observe child behavior, teacher practices, and the classroom/ecological context.
 - b. Identify target behaviors and/or other areas that require intervention
 - c. Collect data appropriate to the referral questions and other concerns that may emerge
 - d. Develop an intervention plan appropriate to the referral questions and other concerns that may have emerged
 - e. Implement the plan, document your observations, and provide appropriate feedback and consultation
 - f. Evaluate the success of the intervention, including using graphs and statistical metrics
4. Provide individual counseling to a student regarding a personal, social or emotional problem. Experience with a counseling case is required for SPSY 6350, but you should also gain additional experience with counseling, including the following activities:
 - a. Maintain regular session notes on all contact with the student(s)
 - b. Establish objectives
 - c. Monitor progress towards those objectives
 - d. Review the progress of the case with your supervisor and adjust the plan depending on progress.
 5. Provide systematic consultation to a teacher, administrator, or parent regarding a student's personal, social, academic, or emotional needs. The consultation exercise is required as part of SPSY 6450 and should include the following activities:
 - a. Maintain regular session notes on all contact with consultees
 - b. Establish objectives appropriate to the referral questions and other concerns that may emerge
 - c. Monitor progress towards those objectives
 - d. Review the progress of the counseling case with a supervisor.
 6. Serve as a co-facilitator or facilitator of a small group intervention for children or adolescents. This is required as part of SPSY 6400, although more group facilitation is encouraged, including the following activities:
 - a. Participate in planning the group
 - b. Participate in securing approval for the group
 - c. Conduct library research on the topic as needed
 - d. Plan topics and evaluation procedures
 - e. Implement the group plan and evaluate student progress and/or success of the intervention
 - f. Your independent group facilitation may appropriately occur when you and your site supervisor(s) concur that your skills have developed to a degree sufficient to facilitate your own small group experience.
 7. Provide a classroom-based affective education intervention for children or adolescents, including the following activities:
 - a. participate in planning the group
 - b. participate in securing approval for the group
 - c. conduct library research on the topic as needed
 - d. plan topics and evaluation procedure
 - e. implement group plan and evaluation
 8. Gain exposure to and understanding of the rationale for and processes involved in each of the activities cited below, and participate in two of the following:
 - i) Kindergarten screening
 - i) Child Find Program
 - i) Parent training education program

- i) Planning and conducting an in-service program for school staff or the community
- i) A screening program to identify children at risk for social, emotional, academic, and/or developmental concerns or disabilities
 - i) A school-based research project or a project to evaluate a school-based program
 - i) MTSS meetings/processes at any or all of the three Tiers
 - i) School-based discipline systems
 - i) Community services that your school/district uses to support children and families
9. Become familiar with and participate in all steps in the special education process, including:
 - a. Understanding eligibility criteria and differentiating between categories.
 - b. Identifying all parts of an IEP document and practicing writing all parts that the school psychologist contributes
10. Optional: participate in a professional development experience, such as the annual conference of the Colorado Society of School Psychologists or other relevant professional conference(s). No more than 10% of your hours may come from conferences or professional development experiences.

Behavioral Competencies for Practicum

In addition to the required assignments and activities described above, there are a number of competencies that students are expected to have by the end of the practicum year. These are objectives that students and supervisors should keep in mind throughout the year and work towards.

By the end of practicum, you should be able to:

- Assessment
 - Independently administer a range of assessment tools (a **minimum** of one independently administered cognitive assessment, one social-emotional, one behavioral, and one adaptive measure)
 - Score all assessments with very few errors
 - Write a school-based special education evaluation report with minimal input from a supervisor
 - Share assessment findings during an IEP meeting
- Data
 - Collect a range of types of student data relevant to all areas of functioning, via both formal measures (e.g., cognitive assessment, curriculum-based measures, standardized social-emotional tools), as well as informal measures (e.g., interviews, observations, etc.).
 - Monitor student progress (pertaining to intervention effectiveness and IEP goals) using data
 - Graph and describe data to families and school professionals
- Intervention
 - Design an intervention plan to address a common student need (e.g., social skills, anxiety)
 - Gather and consider information from multiple sources to conceptualize a student's challenges
 - Modify intervention strategies based on progress monitoring data
- Consultation
 - Provide support to a school professional and/or primary caregiver using consultative approaches for a high-frequency student problem (e.g., behavior, attention, engagement)
- Special Education
 - Recognize eligibility criteria for different special education categories and differentiate between them

- Identify all parts of an IEP document and what information is included
- Have experience writing, or helping write, an IEP document (e.g., present levels, IEP goals)
- Individual and Cultural Diversity
 - Through individual reflection and supervision activities, identify individual biases and stereotypes and how these may impact the provision of school psychology services
 - Research and explore the needs of the school populations and the community services that may support these needs (e.g., unhoused population, food insecurity, policing). This can be done through such activities as supervision, internet searches, attending community meetings, reviewing parent satisfaction surveys, and contacting community partners)
- General
 - Know how to access student record information and be familiar with what is typically found in a student record
 - Demonstrate developing understanding of professional growth and self-reflection through practicum goals, planning, supervision, seeking support when appropriate, and self-reflection.
 - Recognize legal and ethical considerations for service provision and seek information or support commensurate with the situation

The Written Practicum Plan

A written plan for the practicum must be approved early in the student's practicum experience. Your practicum plan is an opportunity for you and your on-site supervisor to discuss your individual goals and determine what experiences you would like to have during the year, both those that are required and additional areas of interest and growth. While writing this plan is primarily the student's responsibility, the final plan must be reviewed and approved by both the School-Based Supervisor and the University Supervisor

The practicum plan should describe the following details of the practicum experience:

✍	The number of practicum hours to be completed and the student's anticipated schedule.
✍	The name and credentials of the district supervisor(s).
✍	The number of hours of individual and group supervision that will be provided.
✍	The goals the student aims to complete at the practicum site.
✍	Specific activities the student plans to complete to work towards their goals and required competencies
✍	Signatures of the student, Site Supervisor, and University supervisor

Additional Responsibilities

1. Throughout the duration of your practicum, it is critical that you identify yourself as a "Practicum Student in School Psychology" when engaged in professional activities. Use this title on all official reports and correspondence.
2. All written reports must be reviewed and co-signed by your on-site supervisor. These may be reviewed periodically with the district and university supervisor(s).

Practicum Supervision

Practicum students in School Psychology will have completed formal course instruction in the skills to be performed at the practicum site but will not have significant applied experience. As a result, they will need close supervision when working in their practicum site. Early practicum experiences should consist of observations and working alongside the experienced supervisor; by the end of the practicum, students should be able to perform many school psychological services independently and subsequently report to the supervisor. In most cases, it is inappropriate for students to provide direct services while an appropriate supervisor is not in the District. The goal of practicum supervision, then, is to move the student from observation of the supervisor to guided practice in the supervisor's presence to independent practice with an immediately available supervisor for backup.

Evaluation of Student Performance on Practicum

Grades for a student's School Psychology Practicum are assigned by the University Supervisor. They are based upon three criteria: the evaluation provided by the Site Supervisor, evaluation by the University Supervisor of any written products of the practicum, and the extent to which the student met formal requirements for the practicum, including planning and evaluation exercises and participation in individual and group supervision.

The Site Supervisor's written evaluation of a student's applied school psychological skills is required before a practicum grade is submitted. Site Supervisors will generally evaluate students using a standard evaluation questionnaire, supplemented with any additional comments. (See [Appendix F](#) for a copy of the Practicum Evaluation Form.) If minor deviations from this procedure are requested by the Site Supervisor, these should be incorporated into the practicum plan. Passing grades (B- or better) will be given by the University Practicum Supervisor when the work products and the Site Supervisor's evaluation document indicate that the student is demonstrating adequate progress in acquiring the skills needed to practice independently in the School Psychology Clinical Externship and Internship. Grades below a B- will be given when student evaluations indicate that the student's skills are insufficient for independent practice in the Clinical Externship or Internship.

Written products of the practicum may be submitted to the University Supervisor. These may include written psychological reports, case notes, intervention plans, consultation notes, or other written documents. In every case, students should black out all identifying information before submitting these materials. Criteria for evaluating these materials will be established by the University Supervisor and will be described to students during the practicum class meetings.

Clinical Externship

Definition and requirements. An externship allows for further development and refinement of previously learned skills and the development of more specialized skills at an advanced level. This placement is completed in a clinical setting such as a hospital, clinic, day treatment center, or center-based program during the student's third year and entails a commitment of approximately 2 full days/week for two semesters, accumulating approximately 500 clock hours. This is completed under on-site individual supervision, as well as on-campus individual and group supervision. Students continue to engage in daily reflective practice. Evaluation of students at this level is based on site supervisor evaluations (using a competency-based rating scale designed specifically for that experience), participation in supervision, and completion of all assignments. These formal evaluations are completed twice each year (once per semester).

Prerequisite courses for externship.

All students must have completed SPSY 6911 School Psychology Practicum and related requirements.

Applying for the clinical externship.

Arranging for an appropriate externship varies from site to site. Most have formal application procedures, and some require interviews. Letters of recommendation may be required. Students should meet with their advisor in the fall before Externship

to explore placement options. Once a Clinical Externship is accepted, the student must complete and submit an Externship Proposal Form to the University Externship Supervisor (See [Appendix G](#)).

Requirements for externship sites. Clinical externship sites must provide appropriate psychological experiences and adequate supervision from a credentialed and experienced licensed mental health professional, psychologist or school psychologist. To provide appropriate experience, a site must be clinical in nature. For example, a hospital, clinic, day treatment center or school-based center program. The primary role of the School Psychology student should be the provision of preventative and remedial mental health services to early childhood, pre-school or school-aged children and youth. Ideally, these settings should provide services to a diverse group of students, including students with and without disabilities, and from families of differing ethnic, cultural, and economic backgrounds.

Regular supervision must be available from a licensed mental health professional, psychologist, or school psychologist. Ideally, the Site Supervisor will be employed by the agency for a minimum of one year. Scheduling should permit the supervisor to provide two hours of face-to-face supervision per week or one hour of weekly face-to-face supervision for students spending less than 10 hours weekly at the placement site. The Site Supervisor should have the flexibility to schedule this supervision at a convenient time. If the Site Supervisor is not a licensed psychologist, the University Supervisor will be available for weekly supervision as needed.

Externship supervision. School Psychology Externs will have completed formal course instruction in the skills to be performed at the externship site but may not have substantial applied experience specific to the externship site's requirements. As a result, they will need close supervision when working in their externship site. Early experiences should consist of observations and working alongside the experienced supervisor; by the end of the externship, they should be able to perform many psychological services independently and subsequently report to the supervisor. In some cases, it is inappropriate for students to provide direct services while an appropriate supervisor is not on-site. The goal of externship supervision, then, is to move the student from observing the supervisor to guided practice in the supervisor's presence to independent practice, with an immediately available supervisor for backup.

Evaluation of Student Performance on Externship. Grades for a student's School Psychology Externship are assigned by the University Supervisor. They are based on two criteria: the evaluation provided by the Site Supervisor and the extent to which the student met the formal requirements for the externship exercises and for participation in individual and group supervision.

The Site Supervisor's written evaluation of a student's applied school psychological skills is required before an externship grade is submitted. Site Supervisors will evaluate students using either an evaluation questionnaire designed specifically for the particular externship site and experiences or the form provided in [Appendix H](#).

Doctoral Internship in School Psychology

Definition of the internship. The required 1,500-clock-hour internship in the School Psychology PsyD Program is a culminating experience in the program's course of study and is completed for academic credit. The internship is intended to provide training and professional competency development that aligns with the School Psychology specialty as outlined by the APA Commission on Accreditation. All internship sites must include a primary emphasis on providing breadth and quality of experiences, attainment of comprehensive school psychology competencies, and integration and application of the full range of domains of school psychology. Via the 1500 clock-hour internship, the integration of professional competencies is practiced, and students are prepared to function as independent school psychologists. Unlike the practicum and clinical externship, where students practiced specified skills under supervision, the intern should assume the full, established role of a school psychologist at the placement site with appropriate supervision. Additionally, the internship is administered primarily by the internship setting, although internship supervision remains the joint responsibility of the university and the internship setting.

Consistent with requirements by the National Association of School Psychologists (NASP) and the Colorado Department of

Education (CDE), the CU Denver PsyD program requires that at least 600 hours of the 1500 clock-hour internship be completed in the school setting. A “school setting” is one in which the primary goal is the education of students of diverse backgrounds, characteristics, abilities, disabilities, and needs. Generally, a school setting includes students enrolled in Grades pre-K–12 and provides both general education and special education services. The school setting has an internal or external pupil services unit that includes at least one state-credentialed school psychologist and provides a full range of school psychology services (NASP, 2020).

Prerequisites for the internship. Interns in school psychology have typically completed all or nearly all formal course instruction in the School Psychology program. The one exception is the credit hours for Capstone (SPSY 8980). With approval of the student's University Supervisor and advisor, students may be permitted to enroll in one course per term (provided that the course is not a core School Psychology course), simultaneously with the internship. Students will be expected to clear all Incomplete grades from their academic record prior to enrolling in the internship. Interns in School Psychology must have successfully completed their School Psychology practicum and externship, in which they practiced the most essential school psychological skills independently, passed comprehensive exams, been admitted to Candidacy by the Graduate School, and completed their Capstone proposal. Students should confirm with their faculty advisor that they have met all prerequisites for internship.

Requirements for internship settings. All internship sites, including those in the school setting, must be a collaboration between the school psychology program and internship placement agency that is consistent with program goals and assures attainment of competencies by interns. The internship setting should be one in which psychological services are provided to children and adolescents. At least 600 hours of the internship must be completed in a school (school-based Externship hours may be used for this purpose, although they must be approved by the program for this purpose), but approval may be requested for completion of the remaining 900 hours in a clinic, hospital, or other appropriate setting. All approved settings must provide opportunities for the intern to engage in a full range of professional activities as defined below; serve a diverse range of clients, including those with and without disabilities, from families of varying ethnic, cultural, and economic backgrounds; and receive appropriate supervision from a credentialed psychologist employed by the agency.

Potential internship placements.

Option 1: Students are *STRONGLY ENCOURAGED* to do this option. The student applies to and is accepted for an internship accredited by the American Psychological Association and/or the Association of Psychology Postdoctoral and Internship Centers. Because the number of APA-accredited or APPIC-approved internships in the greater Denver area is extremely limited and doesn't always accept doctoral students in school psychology, this option usually requires relocation for one year. Application deadlines are in the fall (November). Placements are usually announced by the last Monday in February, with an approximate July 1 start date. Please consult with your faculty advisor to prepare an application. If the APPIC site does not include a school-based rotation, the student will need to complete the required 600 school-based hours at another site (e.g., local school district) that meets all requirements as outlined above and in the Internship Agreement ([Appendix K](#)). This additional placement may extend the student's program and delay graduation by one or more semesters.

Option 2: The student applies for and is admitted to an internship in a school and/or non-school setting in Colorado. This option is recommended for students who want to supplement their training and experience as psychologists in school settings with training and experience in non-school settings. The School Psychology program must approve the internship site and plan. Option 2 internships must meet the guidelines of the Council of Directors of School Psychology Programs (CDSPP) for program approval. The internship should consist of an organized sequence of activities that meet current DORA regulations for licensure as a psychologist in Colorado. Licensed psychologists must provide the internship supervision. An Internship Agreement must be completed and signed by the Field Supervisor, the intern, and the University Internship Supervisor ([Appendix K](#)).

Applying for the internship. During the student's practicum and externship, students will revise their curriculum vitae, receive information about potential internship sites, and learn about the procedures they must complete to secure a placement. APPIC internships tend to have relatively early deadlines, some as early as November 1. Students interested in Association of Psychology Postdoctoral and Internship Centers (APPIC) internships are encouraged to explore various

internship options and procedures on the APPIC site (<http://www.appic.org/>). The CU Denver School Psychology program is an APPIC Doctoral Program Associate, and our students have access to all APPIC resources (use DPA #498).

Most school districts in Colorado have application deadlines in late January or early February for internships beginning the following fall. Information regarding application requirements and procedures for school-based internships will be emailed to the student listserv by the Program Director as it becomes available.

To be cleared for enrollment in a school psychology internship, PsyD students must have completed all coursework and passed their comprehensive exams. In rare cases, students may be allowed to take **one course per semester** concurrent with their internship. **These may not be core SPSY courses.**

Internship Acceptance Policy. Students who participate in the APPIC match are reminded that the match is binding – in other words, once matched, the intern is expected to complete their internship at that site. Students who interview for non-APPIC internships are not to accept an internship offer until approval is given by the Program Director or Director of Clinical Training. **Verbal acceptance of an internship is considered binding** by program faculty and breaking such an agreement will be considered by the faculty to be unethical and unprofessional. In extenuating circumstances students can petition the faculty for permission to change internship sites. Once an internship is accepted, the student must complete and submit an Internship Plan to the University Internship Coordinator (See [Appendix J](#)).

Applying for the Internship License/Authorization. Students who obtain an approved school-based internship in Colorado must apply for an Intern Authorization or TEE from CDE prior to beginning internship. You are allowed to practice for one year under an Intern license and are eligible to receive pay with this license. This license formalizes your position as an intern with both CDE and your district. Forms are available from CDE or your university supervisor. Students who complete internship out of state will need to comply with relevant state licensure statutes.

Requirements for internship settings. The internship setting should be one in which psychological services are provided to children and adolescents. At least 600 hours of the internship must be completed in a school (school-based Externship hours may be used for this purpose as long as all requirements are met as outlined in the internship agreement), but approval may be requested for completion of the remaining 900 hours in a clinic, hospital, or other appropriate setting. All approved settings must provide opportunities for the intern to engage in a full range of professional activities as defined below; serve a diverse range of clients, including those with and without disabilities, from families of varying ethnic, cultural, and economic backgrounds; and receive appropriate supervision from a credentialed psychologist employed by the agency. All internship sites must meet requirements outlined in the Internship Agreement ([Appendix K](#)).

Credit for prior internships: For students entering the program with a graduate degree in School Psychology, the 600-clock-hour school-based internship requirement may be waived. Such waivers will only be approved if the internship was preceded by appropriate graduate coursework and practica and included a range of activities consistent with both program goals and NASP standards. In addition, documentation of internship and associated supervision must be provided (this can be in the form of the NCSP or licensure as a school psychologist by the Colorado Department of Education), as well as evidence that the student has continued to utilize the resulting knowledge and skills on a continuous basis since the time of the internship.

Internship activities. During the internship experience, students must demonstrate the Profession-Wide Competencies as described in the APA Standards of Accreditation to begin effective practice as psychologists. Additionally, consistent with NASP requirements, interns must demonstrate effective school psychology service delivery, as evidenced by a direct, measurable, positive impact on children, families, schools, and other consumers. This impact is demonstrated via the required Professional Practice Case Study completed by the student during internship (see information below).

As such, your internship site must provide a variety of opportunities such that you are able to develop the beginning-level competencies expected of a School Psychologist and as outlined in the School Psychology Internship Evaluation Form (see [Appendix M](#)). In brief, a student's plan of internship activities should meet the following standards:

a) Provide training in a range of psychological service activities. Specifically, the intern should spend at least 10% and no more than 50% of their time on each of the following activities: assessment, direct psychological intervention, and consultation.
b) Provide training in services to children and youth of various ages, cultural backgrounds, and presenting problems. Services to children and youth with disabilities should incorporate children with various needs and disabilities.
c) Involve the intern in all major professional functions provided by psychologists employed at that site.
d) Incorporate scheduled and unscheduled opportunities to interact with other professionals at the site.
e) Assign at least 25% of the intern's time to direct client contact.
f) Provide the intern with opportunities to engage in regularly scheduled training activities with other interns and professionals, including didactic seminars, inservice programs, grand rounds, attendance at professional conventions, and meetings with other professionals.
g) Assign at least two hours per week to scheduled individual supervision with a licensed psychologist AND at least two other hours of supervision per week (individual or group) with a mental health professional appropriately credentialed for the site.

Written Internship Plan. Interns at non-APPIC sites must develop a written plan for the internship to be approved within the first two weeks of the internship placement. In their plan, students are expected to describe a role that fits both the program requirements and the particular internship site. While writing this plan is primarily the student's responsibility, the final plan must be reviewed and approved by both the Site Supervisor and the University Supervisor. The Internship Plan template included in [Appendix L](#) should be used to develop the internship plan.

Internship Supervision. The internship is a culminating training experience that occurs only after successful completion of all core coursework and of required supervised practica and externship. Internships are designed to be sequential, cumulative, and graduated in complexity. As such, there will be increased expectations for the interns' performance in the core competencies as their knowledge, experience, and expertise grow. As the year progresses, interns will be assigned more difficult and complex tasks based on their level of competency. Initially working under the close supervision of experienced and skilled staff members, students will be expected to work with increasing independence as they develop individual competencies.

Internship supervision in the school setting is typically provided by a doctoral-level school psychologist who holds a license in School Psychology from the Colorado Department of Education, is licensed as a psychologist by the state board as required by the Colorado State Board of Psychologist Examiners, has at least 3 years of experience as a school psychologist, and is employed at the site for at least one year. Students completing internship in other states must be supervised by appropriately credentialed school psychologists and psychologists. If the student is completing a portion of the internship in a non-school setting, the site supervisor must be a Licensed Psychologist. If supervision is provided by more than one school

psychologist/psychologist, one person should be designated as the primary supervisor, responsible for the overall integrity and quality of the internship experience and for certifying that immediate access to a supervisor is always available. This person should be a licensed psychologist.

Interns should receive at least 2 hours of individual supervision from a licensed psychologist each week of the internship. In addition, the intern should be provided with at least 2 hours of additional supervision (group or individual) by appropriately credentialed mental health professionals, as well as regularly scheduled learning activities (e.g., case conferences, didactics/seminars, grand rounds) per week.

University Supervision. The School Psychology Intern will also have a University Supervisor who will consult with the Site Supervisor and the intern at least three times over the course of the academic year. Typically, site visits will take place at the beginning, middle, and end of the internship year, and phone and/or email contact will occur in between. Additionally, interns at non-APPIC sites will meet monthly with the instructor of the School Psychology Internship seminar course. These seminars may be in person or virtual.

Evaluation of the internship. Grades for the internship are assigned by the University Supervisor and are based upon the Site Supervisor's evaluation of the student's performance, indicating that the student is ready for independent practice, as well as completion of course requirements (submission of logs, completion of the Professional Practice Case Study). For non-APPIC sites, the Site Supervisor will evaluate students using the evaluation form found in [Appendix M](#), supplemented with written comments. Internship is graded with a letter grade.

Professional Practice Competency Case Study

The School Psychology Program requires candidates to complete and submit a problem-solving case study that aligns with the National Association of School Psychologists (NASP) requirements. The Case Study is a comprehensive treatment project that (a) uses the problem-solving model, (b) involves thorough assessment processes, (c) implements an evidence-based intervention, and (d) evaluates outcomes via multiple sources, including objective measures of treatment effectiveness, data on treatment integrity, and feedback from participants (e.g., teacher, parents, student). The Professional Practice Case Study reflects the School Psychology Program's professional values, particularly the emphasis on data-based decision-making and educational/psychological treatment outcomes.

The case study is a requirement of Internship. The case study must focus on a child or youth who exhibits social-emotional challenges. The requirements for the Professional Practice Case Study are designed to mirror the NCSP case study requirement and is evaluated using the NCSP scoring rubric (see [Appendix N](#)). The Case Study must be submitted via Student Learning and Licensure no later than March 1 of the internship year. The case study should be no more than 10-12 pages long, including charts and graphs. Students who pursue their internships in a hospital or other non-school settings should complete their case study during their 600 hours of school-based internship.

Case Study Guidelines

See application guide at: <http://www.nasponline.org/standards-and-certification/national-certification/apply-for-the-ncsp>

- a. As you choose your Case Study, remember that this is an intervention/problem-solving case study. Case studies that focus on a traditional psychoeducational assessment for eligibility will not meet requirements.
- b. To aid in reviewing your case study, it is helpful if you divide your paper into the four key areas listed below. Labeling these sections is also helpful.
- c. As you address each of the required areas, be sure to include discussion about the subparts listed for several of the areas.
- d. Be sure to proofread and spell-check your case study.
- e. Be sure to label all graphs, tables, or figures.

Section 1: Provide a brief description of the DEIDENTIFIED student, the context, and the presenting issue. In this description, define the problem clearly and present data showing how the observed performance differs from the norm and from the expected level of performance (if different from the norm). Include a baseline graph of your observations. You will also want to include a description of who you are working with on this issue and your process of working together. Although this is not a specific section that you will write up, you will be evaluated to the degree to which your plans reflect legal, ethical, and best practices. Additionally, you will receive a rating on the degree to which your plans reflect a professional product (e.g., spelling, grammar, and organization).

Section 2: In this section, you will want to describe your hypothesis for why the student is performing as described and incorporate all data points that lead you and your team to this conclusion. In your hypothesis, be sure to consider diversity issues (e.g., ability, culture, SES) that might be contributing to the identified concern.

Section 3: This section provides a description of the selected interventions, including a thorough description of why they were selected. That is, how did the data lead you to select these interventions, and how do these interventions relate to your expected outcomes? You will also want to address whether these interventions are evidence-based. In other words, is there research suggesting that these approaches are effective in remediating the presenting issue? Other aspects to consider in your presentation of the selected intervention are the process you used to decide on these interventions and how you were sensitive to individual differences, resources, etc., in your selection and implementation of these interventions. Finally, you'll want to address the logistics of implementing your plan, as well as your process for measuring whether it was implemented as intended.

Section 4: This section reflects your evaluation of your plan. It is expected that you will present graphs that compare the performance of the student before implementing your plan as well as after implementation. You will also need to include a single-case statistic (for example, PND or PEM) to measure your intervention's results. In your evaluation, you will want to address whether your plan was effective, what leads you to this conclusion, and what you and your collaborative team will do based on the data. In your presentation, discuss how the plan will be generalized to other settings and how you shared the outcomes of your intervention.

The rubric in [Appendix N](#) will be used to evaluate your case study. It can also serve as an additional guide as you are developing it. The case study should be no more than 10-12 pages including charts and graphs. There are 26 elements for the case study (total possible points thus is 26), and you should score at least 21 pts or better (at least 80% or better) for each case study in order to pass this assignment and demonstrate that your intervention efforts and plan had a positive effect on student learning and behavior.

Other Policies

Completing Supervised Experiences in Current Worksites. Students occasionally ask to fulfill part or all of their practicum, externship, or internship requirement by working for a school district or mental health agency in which they are already employed. Such arrangements are strongly discouraged because objective supervision and appropriate learning experiences are frequently compromised when a former employee is cast into the role of intern with the joint goals of both learning and service delivery. Students wishing to complete a practicum, externship, or internship in a setting where they are or have been employed must demonstrate to the satisfaction of the School Psychology faculty that they will be functioning as a trainee. Note that approval of such requests is entirely at the discretion of the SPSY faculty and is not guaranteed.

In order to establish that an experience at an employment agency is essentially one of training, students will need to meet the following criteria:

1. Use a title on all official reports and correspondence that identifies the student as a practicum student, extern, or intern in School Psychology for the duration of the supervised work experience.

2. Receive a minimum of two hours per week of supervision from a supervising School Psychologist//Psychologist/Licensed mental health professional. Internship also requires two additional hours of supervision.
3. Have as a supervisor a school psychologist/psychologist (or licensed mental health professional when appropriate) who meets the experience and credentialing requirements of the university program. For internship, the supervisor must be a licensed psychologist.
4. If this request is for internship, the student must spend a minimum of two hours per week in scheduled training activities including seminars, inservice programs, observation of other units, attendance at professional conventions, and meeting with other professionals.
5. If the student wants to complete both the practicum, externship, or internship in the setting as their employment, the student needs to clearly define and differentiate practicum, externship, or internship activities. This is typically accomplished by changing schools, work assignments, or supervisors. (see note below)

Moreover, the practicum, externship, or internship must satisfy all other training requirements of the program, including those listed under “Practicum Objectives”, “Externship Requirements”, and “Internship Activities.” Finally, students will typically not be permitted to complete practicum II, clinical externship, or internship, except as described above. Despite the conditions of the internship, the faculty of the School Psychology program is under no obligation to approve an internship placement at a student’s employing agency and may choose to disallow such placements on grounds other than those listed above.

Schools Where Family Members are Employed. Students completing supervised placements in School Psychology will not be allowed to complete their practicum or internship experiences in schools where family members or relatives are employed. This type of placement may not allow for a neutral learning environment for the student and places the on-site supervisor in a potential dual role. If the student is inadvertently placed in a school where a family member is employed, it is the student’s responsibility to notify the university supervisor at once.

Absences and Withdrawals. The completion of supervised placements in Colorado school districts is governed by Colorado Administrative Rules governing student teaching. Once they have committed to a supervised placement, they are considered members of the placement site's staff and are subject to the same administrative rules and professional expectations that would be imposed on an employee.

Students who are unable to be at their site on the day of their placement must notify their Site Supervisor as soon as possible, and before their first scheduled meeting or activity. Absences cannot count towards the student’s clock hour requirements; in most cases, students will need to schedule additional days in the district to meet their practicum or internship requirement.

Absences are considered justified in cases of family emergencies, religious holidays, or serious illness. Absences other than for these reasons must be approved in advance by the student’s Site Supervisor and the University Supervisor. In most cases, however, students will be expected to follow the schedule of hours set forth in their written placement plan. Students who have excessive unapproved absences from their placement site will be withdrawn from the placement. The decision to terminate a placement due to excessive or unexcused absences is the responsibility of the University Supervisor. This decision is made in close collaboration with the student’s university program advisor and the Site Supervisor.

Technically, students have the right to drop a course early in a term, and the course will not appear on their permanent record. However, because of the special nature of supervised placements and the commitment they represent to the placement site, students must notify the University Supervisor before withdrawing from a placement. At that point, a joint meeting of the student, the Site Supervisor, and the University Supervisor will be convened to negotiate the end of the placement. Students are expected to observe all professional and ethical standards when terminating their placement

responsibilities, and these responsibilities will be specifically described during this meeting. Students who withdraw from placement without negotiating a withdrawal from their placement responsibilities in this manner will be considered to be unjustifiably absent from the placement and will fall under the above rules governing unapproved absences.

Unsuccessful Experiences. Students who are unsuccessful in meeting all requirements and/or the minimum level of achievement for all required competencies during their first practicum, clinical externship, or internship placement will receive a grade that reflects this lack of success. They may request a second placement assignment, and that request may be approved or denied. Decisions to grant second placement assignments will be based on the student's personal written statement describing the first placement and the student's understanding of why it was unsuccessful, and on a discussion between the student and supervisors of the specific factors that contributed to the student's lack of success. If a second placement is necessary, students may be responsible for registering for the 2nd respective field experience and paying all fees and tuition due.

A student's request for a second placement assignment will be reviewed by the University Supervisor, the Site Supervisor, and the student's faculty advisor. This group may deny the student's request, approve it with a modified remediation plan, or approve it as written. Students will not be placed in second supervised placements without intervention to ensure that the same concerns are not present in subsequent assignments. Students who are unsuccessful in two placements will not be permitted to enroll in a third placement, except in highly unusual circumstances; rather, they will be asked to withdraw from the PsyD program in School Psychology.

Legal Status of Students in Colorado Placements. Students' practice during supervised placements is covered for liability under the Colorado Governmental Immunity Act. Colorado law states, as part of the "Cooperative Teacher Education Act of 1973" (as amended in 1975):

1. Any student teacher/field experience trainee, during the time that each student is assigned to a field experience within a public school, shall be deemed to be a public employee of the school district within the meaning of the "Colorado Governmental Immunity Act." The duties and responsibilities of the student teacher shall be determined by mutual agreement between the school district and the college's authorized representative.
2. The student teacher/field experience trainee, during their field experience, shall be deemed an employee of the school district pursuant to the provisions of sections 81-2-2 and 81-2-2, C.R.S., 1963, for the purpose of workmen's compensation and liability insurance as provided for other district employees." The student teacher is responsible for their own acts unless the University or public school personnel are materially negligent in defining and supervising the student teacher's school activities.

Chapter 5: Comprehensive Examination

The *Praxis*® School Psychologist Exam, an assessment case study, a direct intervention case study, and a legal/ethical case study meet the university's comprehensive examination requirement for the PsyD degree. Consequently, university policies relating to the graduate comprehensive examination apply to these program components. Comprehensive exams must be completed and submitted via Student Learning and Licensure by September 1st of the student's third year in the program. If your materials are judged to be 'not passing', you will be allowed to resubmit revised materials for review. However, the university policies only permit comprehensive examinations to be attempted twice.

Praxis® School Psychologist Exam

The *Praxis*® School Psychologist Exam is administered by the Educational Testing Service. Students must take the exam during the summer or early fall of their third year and must achieve a passing score. Students may retake the exam once if they do not obtain a passing score initially. Students are encouraged to access the [Praxis® School Psychologist Exam Prep Session](#) through NASP's Online Learning Center to prepare for the exam. This archived webinar provides valuable information about the blueprint of the *Praxis*® School Psychologist Exam, test-taking strategies, and reviews of 18 practice questions from the ETS Study Guide. Presented by representatives of NASP and ETS, this session will also provide information on navigating the Praxis™ website (including registration) and accessing available *Praxis*® test prep resources. The *Praxis*® School Psychologist Exam, code 5402, is administered through the Praxis Series of the Educational Testing Service. Please upload your score report to the Watermark assignment as soon as you receive it.

Comprehensive Exam Case Studies

Students prepare three Case Studies for this requirement that is reflective of their training and practice. The Case Studies include:

- (1) An assessment case that focuses primarily on an individual assessment, such as early identification of learning and/or behavior problems; assessment of social, cognitive, or emotional development; evaluation of cognitive strategies for learning school subjects; and development and implementation of proposals for assessing learning outcomes.
- (2) A direct intervention case (individual counseling, not a group or academic intervention) which focuses on direct intervention with an individual (e.g., developmental, psychodynamic, cognitive-behavioral, or other intervention used to facilitate social, cognitive, or emotional development).
- (3) A law and ethics case should be selected, in consultation with your advisor and second-year practicum instructor, that is of interest and relevance to the research and practice of school psychology. Students will need to present a strong rationale for the importance of the ethical dilemma in current school psychology scholarship. Students must analyze the dilemma with reference to both NASP and APA codes of ethics, as well as relevant law. Conclusions must be based on an integrated analysis of the law and ethics using an ethical decision-making model. Finally, students must discuss the implications for research and practice that your analysis reveals. Sources and theorists are cited and referenced in APA style.

Case Study Guidelines

- (4) Students must submit their *Praxis* score report and the written Comprehensive Exam Case Studies via Student Learning and Licensure by September 1st of the third year (externship year) of the program.
- (5) Each Comprehensive Exam Case Study should be no more than ten double-spaced pages and align with APA formatting. Students may attach a written report as an appendix. The cover page, references, and appendices do not count towards the total number of pages. See [Appendix I](#) for the Comprehensive Exam Evaluation Rubrics.

- (6) The written assessment and intervention case studies should include the following components:
- a. The presenting problem
 - b. The theoretical or clinical rationale for the professional activities performed
 - c. Relevant case history
 - d. A brief review/understanding of the research supporting the professional activities undertaken
 - e. The assessment and/or intervention procedures used
 - f. The ethical, legal and professional issues involved in the professional activity
 - g. References.
- (7) All three case studies should reflect:
- a. A depth and breadth of knowledge from the full range of foundations of psychology (affective, biological, cognitive, developmental, socio-cultural);
 - b. Strategies for effectively diagnosing/identifying learning and emotional needs and facilitating growth;
 - c. The ability to engage in multidimensional case conceptualization based on the major foundations of behavior

Chapter 6: Capstone Project

The Capstone Project is a culminating component of the academic program. This requirement entails the production of a scholarly project that illustrates the student's ability to independently conduct research, understanding of relevant topics in school psychology, the scope of contemporary practice, and the various roles of the professional school psychologist. The student selects a topic of school psychology practice that has emerged as a particular area of interest. Doctoral capstone project work promotes the integration, expansion, and consolidation of previously established research and/or investigation competencies.

The Capstone Project will be completed in the 3rd or 4th year of the PsyD program. The topic of the capstone project will be selected by the student in conjunction with the student's faculty advisor and the student's externship or internship site, if appropriate. The faculty advisor will meet periodically with the student to mentor the project.

The Capstone Project Topic Information Form must be completed by the student in the spring semester of the 3rd year of the PsyD program (Due March 30, see [Appendix O](#)). If the student chooses to do an applied research project at an externship or internship site, there must be agreement among the site supervisor, the student, and University faculty members regarding the focus of the project, methods to gather information, and techniques to explain project findings. In addition, the student may be required to complete Human Subjects Approval at the University and/or district levels.

By the end of the spring semester of the 3rd year of the PsyD program, the student must produce a written document concerning the project (see outline below). After the written product is presented to the faculty advisor, the core faculty members must agree that the project demonstrates competency with respect to completing an applied or general research project. Ideally, the project will examine a problem of practice and offer location-specific, evidence-based implications for the field site.

Capstone Project Committee

The Capstone Project committee includes at least 3 individuals: the faculty advisor who serves as primary advisor, another core SPSY faculty member, and another core SPSY faculty member, OR a professional from the field with expertise related to the focus problem, OR a full- or part-time SEHD faculty member. All members of the capstone project committees must hold graduate faculty status. Students will submit the final capstone project to Student Learning and Licensure for review and evaluation. Students will also upload a completed Thesis Approval Form in Student Learning and Licensure.

The doctoral committee will evaluate the capstone via the Capstone Evaluation Form (See [Appendix P](#)). Once the student has received a passing evaluation of their capstone, the student is to provide their faculty advisor/committee chair with a completed Thesis Approval Form. The committee will sign the form, and the primary faculty advisor will submit it to the Registrar's Office to document successful completion. An electronic copy of the capstone project must be submitted for formatting review by the date listed on the deadline calendar for the initial format review. Once formatting is approved, the student submits it to ProQuest for publication.

The student is also required to disseminate the project and its findings. Appropriate forums for presentation include: the annual SPSY Research Symposium, faculty meeting, school board meeting, mental health staff meeting at the field site where the project was completed, and professional conference (e.g., CSSP, NASP, APA). Capstone research must also be disseminated via publication in ProQuest. Additional dissemination can also occur via a professional journal and/or newsletter*.

Capstone Project Schedule

- Fall or Spring of Externship:
 - Topic selection and approval by faculty adviser and submission of Capstone Project Topic Information Form
 - Proposal (first three chapters: introduction, literature review, methods). Due date: May 15
- Fall or Spring of internship year:
 - Final doctoral project (final version of above, plus results and discussion)
 - Submission of the project to ProQuest for digital publication
 - Colloquium (public presentation of project and/or submission for publication*)
 - Presentation of the project at the SPSY Research Symposium during internship year
 - Completion and submission of a Thesis Approval Form to your faculty advisor (available at <https://www.ucdenver.edu/graduate-education/academics/forms>)

Suggested Capstone Project Formats

(Please see the Office of Graduate Education Website for specific requirements and additional information): <https://www.ucdenver.edu/graduate-education/academics/thesis-and-dissertation>). All capstone projects should follow the APA Publication Manual, 7th Ed.

Applied Research Project/Program Evaluation

1. **Chapter 1: Introduction/Background of the Problem**
 - a. Background of the problem at the location: describe location and nature of the problem
2. **Chapter 2: Review of relevant literature**
 - a. Methods/Techniques Used to Examine the Problem
 - b. Explain the steps and techniques used to examine the problem
3. **Chapter 3: Methods/Results/Findings**
 - a. Findings are presented through the narrative, tables, and figures
4. **Chapter 4: Discussion and Implications**
 - a. Discuss the findings of the project in greater detail
 - b. Implications for the field site
 - c. Discuss similarities or dissimilarities with the professional literature
 - d. Discuss any limitations when interpreting the site-specific findings
 - e. Provide site-specific, evidence-based recommendations as appropriate
5. **References**

Capstone Research Project Outline

- 1. Chapter 1: Introduction**
 - a. Statement of the Problem
 - b. Significance of the Problem (and historical background)
 - c. Purpose
 - d. Research Questions
- 2. Chapter 2: Literature Review** (and analysis of previous research)
- 3. Chapter 3: Method**
 - a. Description of Research Design and Procedures Used
 - b. Sources of Data
 - c. Sampling Procedures
 - d. Methods and Instruments of Data Gathering
- 4. Chapter 4: Results**
 - a. text with appropriate tables and figures
- 5. Chapter 5: , Limitations, and Conclusions**
- 6. References**

****NOTE: All students are required to publish their capstone in ProQuest Dissertations & Theses at the University of Colorado Denver database, as well as disseminate their findings via a presentation. Students are encouraged to submit their capstone project for publication in other outlets as well.***

Students should refer to the Graduate School's document entitled "[Format Guidelines for Theses and Dissertations](#)" when writing their Capstone.

Chapter 7: Appendices

Appendix A: Student Responsibility Contract

SCHOOL PSYCHOLOGY PROGRAM

STUDENT RESPONSIBILITY CONTRACT

I, _____ (student name), verify that I have read Student Handbook from the School Psychology program at the University of Colorado Denver. I understand the official policies, procedures, and requirements as stated in the handbook and agree to comply with them. I also understand that I am responsible for reviewing and following the policies, procedures, and requirements detailed in this handbook, and that any questions I may have about its contents I will address with my academic advisor.

I further agree that the Faculty of the School Psychology program at the University of Colorado Denver has the right and responsibility to monitor my academic progress, my professional ethical behavior, and my personal characteristics. If, in the opinion of the faculty, any or all of these are in question, I agree to participate in creating and following a remediation/support plan as designed by my advisor and me. If these efforts are unsuccessful and concerns persist, I agree to abide by the faculty's decision on whether I will continue in the program.

Signature of Student

Date

Please give this completed form to your faculty advisor. Your advisor will sign the form and keep an electronic copy.

Faculty Advisor

Date

Appendix B: Course Transfer Requests

Procedures To Transfer a Course CU Denver School of Education & Human Development

Documentation and Conditions:

1. An education course, completed within the past seven (7) years, with the same or similar title to a required course, may be accepted by the student's advisor without the completion of a waiver form. The advisor will generally question the student regarding the course content and may request further documentation. The student must have at least a "B" grade in the course.
2. Courses that are older than 10 years will not generally be waived. If they are approved, a Course Validation form must be completed (available at <https://www.ucdenver.edu/graduate-education/academics/forms>)

Procedures:

1. Complete a Transfer Request Form (<https://www.ucdenver.edu/graduate-education/academics/forms>) and gather required documentation, including an official transcript indicating the grade received in the course. A course syllabus may also be required
2. Meet with your faculty advisor and request permission to transfer in the course. Bring your transfer request form and supporting materials.
3. Your advisor may discuss the request with the faculty member who typically teaches the course you are requesting to be transferred and ask that they review your request. Additional documentation or evidence of mastery may be requested by the faculty member who first reviews your request.
4. Following the typical course, your advisor will review the transfer request and inform you of the decision.

Appendix C: Student Academic Appeals Procedure

STUDENT COMMITTEE APPEALS PROCESS

Purposes

One purpose of the Student Committee (SC) is to review students' academic appeals regarding academic matters such as grade appeal, academic dishonesty, or honor code issues. The committee assumes an impartial and unbiased stance toward all participants in the academic appeal process, and focuses on adherence to university policy and basic standards of fairness and professionalism. Appeals are heard by this committee at the written request of an SEHD student. Appeals may originate from students in any degree or licensure program in the SEHD to which the student has been admitted. The SC's decision will be communicated to the student, the faculty involved in the appeal, the Associate Dean who oversees the program, and the Dean. The SC's decision will be considered final unless the student chooses to appeal directly to the Dean, as outlined below.

Committee Composition

The committee is composed of faculty members from multiple SEHD programs and one SEHD staff representative. Typically, faculty members serve for two years, with the possibility of continuing to serve longer. Each year, a committee chair is elected from the members of the SC. The chair directs regular SC meetings and, in conjunction with the Director of Academic Services and/or their designee, advises students and faculty on SC policies and procedures and schedules the committee for appeal hearings.

Student Academic Appeals

- The School Psychology PsyD program is under the rules of the CU Denver Office of Graduate Education, so please contact them regarding appeals related to dismissal from the degree program and those related to comprehensive examinations or activities.

The SEHD SC hears SPSY student appeals that relate to:

- grade appeals and problems related to course grades;
- appeals related to academic honor code issues.

The SC might refer non-academic appeals to other avenues of appeal, including, but not limited to:

- sexual harassment or discrimination of any kind - CU Denver Civil Rights Officer;
- financial concerns - Bursar's Office or Financial Aid;
- student conduct - Student Code of Conduct;
- licensure - Colorado Department of Education;
- other, or more general concerns - CU Denver Ombuds Office.

When appeals are reviewed by the committee, only materials directly relevant to the appeal will be considered. The student and the faculty member or members involved in the appeal should keep documentation of and materials related to the appeal for a period of five years from the beginning of the semester in which the issue(s) relevant to the appeal began. An official file of all materials will be kept by the SEHD (see "Retention of Academic Appeals Materials" below).

Faculty Participants in Student Academic Appeals

Faculty participants in the academic appeal process are those faculty members who have been part of the decision-making process under appeal, witnesses to student/faculty discussions, administrators, and other CU Denver officials, as required for purposes of clarity, safety, and procedural propriety. Other examples of participants include a course instructor or instructors, program area faculty, internship supervisors, and program teams.

Student Participants in the Student Academic Appeals Process

Student participants in the academic appeals process are the student who has filed an appeal for the SC to review and another person to accompany the grievant to *Appeal Level 3* (if applicable). The other person may be a friend, colleague, classmate or faculty member, but not a member of the SEHD staff.

Academic Appeal Procedures

Appeal Level One--Initial Decision

1. The first step in an appeal is for the student to meet with the faculty member or members who made the decision the student wishes to contest. Issues pertaining to the student's grade or performance, evaluation criteria for decision making, or differences of opinion that exist should be discussed in an attempt to work through the disagreement. This first step of meeting with faculty member(s) should take place as soon as possible after the precipitating decision and, in no case, later than 30 days after the end of the term in which the decision was made. All such initial meetings should be attended by at least one additional (neutral) CU Denver faculty member or administrator who will serve as observer and note-taker.

Appeal Level Two--Student Committee Review

2. If the issue remains unresolved after the student/faculty member meeting, the student may appeal to the SC through a written request submitted to the chair of the SEHD SC within 30 days after the meeting with faculty member(s) outlined in Appeal Level 1 above. Academic Services may offer advice to the student regarding how to compose and file the appeal. The written appeal must be a letter submitted by the student to the SC Chair, detailing the complaint in detail. The letter should answer these questions:
 - a. **What is the term/year you are appealing?** Note: Appeals should be submitted within one semester of the academic issue being appealed. See number 4 below.
 - b. **What, exactly, is being appealed?** Clearly provide the course number and title for a grade appeal or honor code appeal.
 - c. **What are your specific objections to the decision under appeal?** Refer to specifics on the course syllabus or to specific program or SEHD policies and procedures, handbooks, forms and signed documents.
 - d. **What is the rationale for your objections?** Provide a succinct narrative that clearly indicates why you believe the decision under appeal was not appropriate. Refer to the available materials (e.g., syllabi, policies, and procedures documents) as appropriate in providing your rationale. Focus specifically on your individual appeal and refrain from referring to other students or faculty.

- e. **What changes do you request, and what are your specific reasons to support your request?** Indicate clearly what you believe would be a fair resolution to the issue under appeal.
3. As noted above, the letter of appeal should be submitted within 30 days following the meeting with the faculty member or members outlined in the first level of the appeal process. The SC chair will review the appeal letter and request further information if necessary, and, if he/she deems the appeal to be within the purview of the committee, will forward the letter to SC committee members and the Associate Dean responsible for the program to which the student was admitted. If the letter is submitted between the end of the spring and the beginning of the fall semester, the letter will be reviewed at the first SC meeting in the fall semester. Academic appeals will be reviewed and responded to during the months of September through November and February until the first week in May.
4. The faculty member or members named in the student's appeal will be notified of the student's appeal and provided with a copy of the student's appeal letter. The faculty member or members will respond to the appeal in a written statement to the SC within 14 days of their receipt of the notification of appeal. Exceptions to this 14-day limit may be allowed in special circumstances if the SC deems appropriate. Additionally, all parties involved in the appeal may receive copies of all submitted documentation pertaining to this case on a need-to-know basis as determined by the SC chair.
5. The student's written appeal request (containing all required information) and faculty response will be reviewed by the SC at their next regularly scheduled meeting. The SC chair may ask for additional materials as needed.
6. If students or faculty member/members fail to provide requested information in writing, the SC will proceed based on the available evidence.
7. The SC will reach a decision based on the documentation. The SC's decision will be communicated in writing to the student, the faculty member (s), and the Dean within 14 days of the SC's decision. If deemed appropriate by the SC, a formal appeal hearing may be scheduled for the next regular meeting time of the SC. A majority vote of the SC is necessary in order to schedule a formal appeal hearing

Appeal Level Three--Student Committee Formal Hearing

8. At the appeal hearing, the student and the faculty member/members both have the opportunity to make a 20-minute (maximum) oral presentation.
9. During the appeal hearing, SC members may request further information or ask questions.
10. The student and faculty member/members may bring one advocate to the appeal hearing. This individual may listen, take notes, and advise the student, but may not present to the committee. Advocates may be faculty, classmates, students, or friends, but may not be staff members of SEHD. In addition, the SC may also request the presence of any administrators and/or other university officials as required for purposes of clarity, safety and procedural propriety.

11. The SC will review all information and render a timely decision. In most cases, and depending on their scheduled meetings, the SC will reach a decision within 40 days after the appeal hearing. Neither the student nor the faculty member or members involved in the appeal may be present, or consulted by, the SC during these deliberations.
12. The student and faculty member or members will be notified by letter within 45 days of the concluding decision of the SC. A copy of this decision will be forwarded to the Dean of the SEHD.

Appeal Level Four--Dean, School of Education & Human Development

The student or faculty member's next level of appeal is the Dean of the SEHD. Appeals materials provided to the SC will be shared with the Dean. The Dean may also request additional information as needed. This appeal to the Dean must occur within 30 days of the SC decision.

Student Committee composition for formal appeal hearings

- A SEHD Associate Dean serves as the non-voting committee convener during the formal appeal hearing.
- A majority of voting members or their appointed substitutes must be present for the formal appeal hearing.
- The student, the faculty member/members, and the SC may each have one non-voting representative at the appeal hearing. This representative may listen and advise but not participate in the presentations to the committee. The representative may not be a staff member of SEHD. In addition, the SC may request the presence of any administrators and/or other university officials as required for purposes of clarity, safety, and procedural propriety.
- Both the involved faculty member(s) and the student may be present during the entire appeal hearing.
- If a SC member has extensive knowledge of the case or the student (e.g., is a member of the decision team that is being appealed or is the student's advisor), he or she will be asked to recuse himself or herself from the appeal hearing.
- Appeal hearings may be video- or audio-taped only if all parties at the hearing agree to this procedure. Requests for video or audio taping must be made in writing, addressed to the SC committee chair, and received at least one week before a hearing is scheduled. The chair will contact participants for a yes or no vote and alert all participants of the outcome of the vote prior to the meeting.

Retention of Academic Appeal Materials

SEHD responsibilities

All materials related to an academic appeal, including written statements from students and faculty, written decisions by the SC, and requests for materials from the Dean of the SEHD and the CU Denver Graduate School, will be housed in a secure, confidential file in the Academic Services Office. This official file will be maintained under the name of the student originating the appeal. The official file will be retained for at least five years.

Student responsibilities

The student is responsible for keeping copies of all written materials submitted to both the faculty member and members and those submitted to the SC. It would be appropriate for the student to keep records of times, dates, content of conversations, and suggested solutions discussed during the process of trying to resolve the problem.

Faculty responsibilities

The faculty member or members should keep copies of all written materials related to the student appeal. This would include student letters, responses, and course or program documents related to the appeal. It is also recommended that faculty members keep records of times, dates, content of conversations, and suggested solutions discussed during the process of trying to resolve the problem with a student.

Self-ratings on Required Competencies

Please rate yourself on each of the following required competencies using the scale below. Please include an example that illustrates your level of competency (e.g., I have only had one class in this area; **or**

I got grades of B or lower on some assignments in this area; **or** have completed practicum and advanced assessment and received grades of A)

1) No exposure yet

2) Exposure only

3) Novice – beginning understanding

4) Advanced beginner – have a good grasp of some concepts /able to demonstrate proficiency in some aspects of this competency, but not all

5) Competent (*typical rating for interns*) – have a good grasp of all relevant concepts /able to demonstrate proficiency in all aspects of this competency

For example:

Intervention Competency: Students must demonstrate competence in understanding and implementing evidence-based interventions consistent with the scope of Health Service Psychology.

Self Rating: 2) Exposure only

Example supporting rating: I have learned about evidence-based interventions in one or more classes but have not yet had the opportunity to implement an evidence-based intervention.

Self Rating: 3) Novice-beginning understanding

Example supporting rating: I have learned about evidence-based interventions in two or more classes, and I have implemented an intervention, but needed significant guidance/supervision in doing so.

Self Rating: 4) Advanced Beginner

Example supporting rating: I have learned about evidence-based interventions in two or more classes and I have implemented evidence-based interventions multiple times with some level of independence.

Self Rating: 5) Competent

Example supporting rating: I have implemented multiple evidence-based interventions with minimal guidance/supervision.

Ethical and Legal Standards Competency: Students must be knowledgeable of and act in accordance with relevant professional standards, and legal and ethical guidelines.

Self Rating: _____

Example supporting rating:

Individual and Cultural Diversity Competency: Students must demonstrate knowledge, awareness, sensitivity, and skills when working with minoritized individuals and communities.

Self Rating: _____

Example supporting rating:

Professional Values, Attitudes, and Behaviors Competency: Students must behave in ways that reflect the values and attitudes of health service psychology, including integrity, professional identity, accountability, lifelong learning, and concern for the welfare of others.

Self Rating: _____

Example supporting rating:

Communication and Interpersonal Skills Competency: Student must maintain effective professional relationships, including demonstrating effective oral and written communication skills.

Self Rating: _____

Example supporting rating:

Assessment Competency: Students must demonstrate understanding of and competence in conducting evidence-based assessments consistent with the scope of Health Service Psychology.

Self Rating: _____

Example supporting rating:

Intervention Competency: Students must demonstrate competence in evidence-based interventions consistent with the scope of Health Service Psychology.

Self Rating: _____

Example supporting rating:

Supervision Competency: Students must demonstrate knowledge of supervision models and practices.

Self Rating: _____

Example supporting rating:

Consultation and Interprofessional/interdisciplinary Skills Competency: Students must demonstrate knowledge of consultation models and practices, and respect for the roles and perspectives of other professions.

Self Rating: _____

Example supporting rating:

Research Competency I: Students must demonstrate knowledge, skills, and competence sufficient to contribute to and disseminate research that is appropriate for the scope and expectations of the practice context.

Self Rating: _____

Example supporting rating:

Research Competency II: Students must critically evaluate and use existing knowledge within the practice of health service psychology.

Self Rating: _____

Example supporting rating:

Program Specific Competency:

Demonstrates knowledge of general education, special education, educational and related services, including how the system works as a whole.

Self Rating: _____

Example supporting rating:

Personal/Professional Development (maximum 2 typed pages total):

1. Describe three significant areas of personal/professional growth during this academic year.
Second and third year students should tie these to the goals they had for themselves last year.

2. From the feedback you have received from instructors, supervisors, and/or your faculty advisor, what aspect(s) of your training program have been the most challenging for you?

2b. How have you used the feedback you've received?

3. Please describe any feedback you have obtained related to your writing abilities.

3b. How have you used this feedback? Describe any plans to utilize this feedback in the future.

4. Please describe any feedback you have received from instructors, supervisors, and/or your faculty advisor regarding your ability to meet deadlines, follow through with coursework or field-placement expectations, and/or communicating with them?

4b. How have you been managing academics, life, etc. (include what you do to foster well-being).

5. Describe three personal/professional goals you have for the upcoming year.

School Psychology Program

SPSY PERSONAL/PROFESSIONAL DISPOSITIONS REVIEW FORM

Please list the name(s) of any student in your class with whom you have/had concerns in any of the following areas and describe these challenges. Also, please indicate any students who have super impressed you.

Your Name: _____

Course Number and Name: _____

1. Student(s) with challenges with attendance and/or punctuality (list name(s) and any other additional info that might be helpful:
2. Student(s) with challenges turning in work/follow-through:
3. Student(s) with oral communication challenges:
4. Student(s) with challenges related to email/electronic communication:
5. Student(s) with challenges with quality of written work:
6. Student(s) with challenges with mastery of/understanding course content:
7. Students with challenges with developing required skills/competencies:
8. Students with challenges with ethical behavior:
9. Students with challenges with peer interactions/relationships:
10. Students with challenges with interactions with instructor:
11. Students with challenges with cultural sensitivity/responsiveness:
12. Students with challenges with hearing/accepting constructive feedback:
13. Students with other challenges (please specify what those are):
14. Students who have excelled in the quality of work submitted:
15. Students who have excelled in the quality of contributions to class discussions:
16. Students who have demonstrated exceptional growth in content knowledge and/or competency/skills development:
17. Students who have demonstrated exceptional leadership skills:
18. Students who have demonstrated some other type of excellence (please specify):

Appendix F: Practicum Evaluation Form

School Psychology

SCHOOL OF EDUCATION & HUMAN DEVELOPMENT

UNIVERSITY OF COLORADO **DENVER**

Hello Practicum II Site Supervisors! Please use the following CU Denver Practicum School Psychology PsyD Evaluation form to rate your practicum student's current level of progress and competence. Please note that this form is designed to provide practicum students with comprehensive feedback on strengths and areas for growth.

A final evaluation score below Level 3 (Externship Ready) may result in the development of a remediation and support plan and may prevent a student from advancing to externship. By the final evaluation, students should have few or no areas marked N/A. N/A ratings typically only when a student has a split placement (e.g., a school site and an assessment team). In these cases, each competency area must be rated at Level 3 or higher by at least one supervisor by the end of the practicum.

At the mid-year evaluation, students typically demonstrate a range of developing skills, which is expected. However, students must show a minimum rating of Level 2 (Developing) in all competency areas for which they have had exposure. A score below Level 2 at mid-year may trigger the creation of a remediation and support plan.

Qualitative descriptions of students' behaviors, progress, and skills are invaluable for understanding professional development. Therefore, we appreciate you taking the time to answer the questions below and provide specific behavioral examples whenever possible.

The evaluation consists of two parts. First, you will be asked to provide some information through open-ended questions, followed by Likert-type choices for a series of questions asking about specific areas of competency.

Please reach out to the SEHD Assessment Office for technical support
SEHDHELP@ucdenver.edu

Thank you for your help evaluating this student and for the excellent training opportunities you have provided our students this year!

EVALUATION METHODS USED

Check all that apply*

Direct Observation (Required)

Review of Audio/Video

Case Presentation

Documentation Review

Supervision

Comments from other Staff/Faculty

Qualitative descriptions of students' behaviors, progress, and skills are invaluable for understanding professional development. Therefore, we appreciate you taking the time to answer the questions below and provide specific behavioral examples whenever possible.

Major accomplishments/achievements during practicum:*

Areas of demonstrated strength:*

Areas needing improvement or enhancement:*

Specific steps, actions, and/or experiences that will be taken to further address areas in need of improvement or enhancement:*

Evaluation Scale

Directions: Please carefully read the descriptions for the rating scale below and use the rating scale to evaluate the practicum student's skill development.

Note: By the mid-year evaluation, students are expected to demonstrate **Level 2 performance or higher** in all competency areas in which they have had meaningful experience. It is essential that supervisors communicate any concerns promptly, particularly if a student is not progressing as expected so that a support plan can be developed to get the student back on track.

By the end of Practicum II, students are expected to reach **Level 3 or higher** across nearly all competency areas. The only exceptions apply to students in **split placements**, who may not have been exposed to every competency within a single site. In these cases, students must receive a **Level 3 or higher rating from at least one supervisor in each competency area.**

- **Exemplary - 5** Student exhibits the competency at an exemplary level that exceeds expectations for predoctoral internship readiness and is more

characteristic of interns or independent practitioners. Student practices effectively with minimal supervision.

- **Internship Ready-4** Student exhibits competency at a level that is above expected in terms of level of competence or independence.
- **Externship Ready - 3** Student exhibits the competency at a level that is on par with expectations for moving on to externship. This includes foundational competence in core activities, with appropriate supervision.
- **Developing - 2** Student exhibits the competency at a developing level that aligns with expectations for advanced practicum training. Student demonstrates increasing effectiveness in response to typical levels of supervision.
- **Emerging - 1** Student exhibits the competency at an emerging level that is characteristic of novices in early stages of training. Student demonstrates growing knowledge and skills in response to typical levels of supervision.
- **N/A-Inadequate** - Opportunity to observe student in this area N/A- Experience or opportunity is not applicable at this site.

COMPETENCY AREA: INTERVENTION

1. Establishes and maintains effective relationships with the recipients of psychological services*
2. Develops evidence-based intervention plans specific to service delivery goals*
3. Appropriate interventions are implemented, including consideration of relevant current scientific literature, assessment findings, identity characteristics, and contextual variables*
4. Demonstrates the ability to apply relevant research literature to clinical decision making*
5. Effectively modifies and adapts evidence-based approaches when a clear evidence base is lacking*
6. Evaluates intervention effectiveness and adapts goals and methods based on data*

COMPETENCY AREA: ASSESSMENT

7. Demonstrates knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including strengths and psychopathology*
8. Demonstrates understanding of human behavior within its context (e.g., family, social, societal, and cultural)*

9. Applies knowledge of functional and dysfunctional behaviors, including context, to the assessment and/or diagnostic process*
10. Selects and applies assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics*
11. Collects relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment, as well as relevant identity characteristics*
12. Interprets assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations*
13. Recognizes the potential for decision-making biases and distinguishes between assessment findings that are subjective and those that are objective.*
14. Communicates findings in an accurate and effective manner, sensitive to a range of audiences*

COMPETENCY AREA: ETHICAL AND LEGAL STANDARDS

15. Demonstrates knowledge of and acts in accordance with the APA Ethical Principles and Code of Conduct*
16. Demonstrates knowledge of and acts in accordance with all relevant organizational, local, state, and federal laws, regulations, rules, and policies*
17. Demonstrates knowledge of and acts in accordance with all professional standards and guidelines*
18. Recognizes ethical dilemmas as they arise and applies ethical decision-making processes in order to resolve them*
19. Conducts self in an ethical manner in all professional activities*

COMPETENCY AREA: CULTURAL AND INDIVIDUAL DIVERSITY

20. Demonstrates an understanding of how their own personal/cultural history, attitudes, and biases affects how they understand and interact with others*
21. Demonstrates knowledge of the current theoretical and empirical knowledge related to diversity and addressing identity in all professional activities including research, training, supervision/consultation, and service*
22. Integrates knowledge of individual and cultural differences in the conduct of professional roles*

23. Demonstrates the ability to independently apply their knowledge and approach in working effectively with the range of diverse individuals and groups*

COMPETENCY AREA: PROFESSIONAL VALUES, ATTITUDES AND BEHAVIORS

24. Behaves in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others*

25. Behaves professionally. This may include things like timeliness and professional communication*

26. Engages in self-reflection regarding one's personal and professional functioning*

27. Engages in activities to maintain and improve performance, well-being, and professional effectiveness*

28. Actively seeks and demonstrates openness and responsiveness to feedback and supervision. This includes the ability to have open conversations about the development of professional skills and to incorporate feedback into subsequent activities*

29. Responds professionally in increasingly complex situations with a greater degree of independence as they progress through practicum*

COMPETENCY AREA: CONSULTATION AND INTERPERSONAL/INTERDISCIPLINARY SKILLS

30. Demonstrates knowledge and respect for the roles and perspectives of other professions*

31. Applies knowledge about consultation in direct or simulated (e.g. role played) consultation*

32. Recognizes the role of diversity and identity, including potential biases, on the problem-solving and consultation process*

COMPETENCY AREA: COMMUNICATION AND INTERPERSONAL SKILLS

33. Develops and maintains effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services*

34. Produces and comprehends oral, nonverbal, and written communications that are informative and well-integrated; demonstrates a thorough grasp of

professional language and concepts*

35. Demonstrates effective interpersonal skills and the ability to manage difficult communication well*

COMPETENCY AREA: SUPERVISION

36. Apply knowledge of supervision models and practices in direct or simulated practice with psychology trainees, or other health professionals. Examples of direct or simulated practice examples of supervision include, but are not limited to, role-played supervision with others, and peer supervision with other trainees*

COMPETENCY AREA: RESEARCH

37. Demonstrates the ability to critically evaluate research or other scholarly activities (e.g., case conference, presentation, publications)*

38. Incorporates research and research-based information into fieldwork activities*

COMPETENCY AREA: PROGRAM SPECIFIC COMPETENCIES

39. Demonstrates knowledge of general education, special education, educational and related services, including how the system works as a whole*

40. Demonstrates skill in identifying individuals or groups, ages birth to twenty-one, who may benefit from targeted interventions, instructional supports, and psychological services, using screening, progress monitoring, and other tools.*

41. Demonstrates the ability to plan and implement interventions at different levels (e.g. individual, group, classroom, and systems level), including positive behavioral supports (e.g. classroom accommodations, FBAs, etc.).*

42. Demonstrates an understanding of school-based crisis intervention strategies (e.g., suicide risk assessment, threat assessment, crisis response, etc.) and provides crisis intervention as needed.*

PRACTICUM II EVALUATION - SIGNATURE FORM

SIGNATURES: This evaluation will be kept in the practicum student's file. This signature attests that as the practicum site supervisor, I have reviewed this evaluation and attest that the student has completed all of the responsibilities for this practicum **and that the evaluation was based at least in part on direct observation.**

ADDITIONAL COMMENTS*

Practicum site supervisor, please enter your name into this block to acknowledge

that you agree with the statement above and this will act as your electronic signature.

Appendix H: Externship Evaluation Form

UNIVERSITY OF COLOADO DENVER
School Psychology Program
Clinical Externship Evaluation Form

Student Name: _____ **Date:** _____

Externship Site: _____

Supervisor Name & Credentials: _____

Directions: Evaluation should be based on current level of progress and competence in the externship. **Each Externship evaluation must be based in part on direct observation of the candidate and their developing skills (either live or by video recording). Such observation must occur at least once per semester and need not encompass all competency areas at any given time.**

Directions: Circle the number that best describes the student's competence as given in the description below.

Please rate each category independently.

The minimum level of achievement (MLA) expected at the end of externship is a rating of "3" on all elements.

- 1- Extern is in need of further training and/or requires additional growth, maturation, and change in order to be effective in the various skill areas; extern should not be allowed to function independently.
- 2- Competence is below average but, with further supervision and experience, is expected to develop satisfactorily; independent functioning is not recommended and close supervision is required.
- 3- Internship ready: Competence is at least at the minimal level necessary for functioning with moderate supervision required
- 4- Competence is above average; extern can function independently with periodic supervision.
- 5- Competence is well developed and extern can function independently with little or no supervision required.

PROFESSIONAL VALUES, ATTITUDES, AND BEHAVIORS

MIDTERM		FINAL
N 1 2 3 4 5	1. Behaves in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others	N 1 2 3 4 5
N 1 2 3 4 5	2. Engages in self-reflection regarding one's personal and professional functioning; engages in activities to maintain and improve performance, well-being, and professional effectiveness	N 1 2 3 4 5
N 1 2 3 4 5	3. Actively seeks and demonstrates openness and responsiveness to feedback and supervision	N 1 2 3 4 5
N 1 2 3 4 5	4. Responds professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training	N 1 2 3 4 5

CULTURAL AND INDIVIDUAL DIVERSITY

MIDTERM		FINAL
N 1 2 3 4 5	5. Demonstrates an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves	N 1 2 3 4 5
N 1 2 3 4 5	6. Demonstrates knowledge of the current theoretical and empirical knowledge base as it relates to diversity as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service	N 1 2 3 4 5
N 1 2 3 4 5	7. Integrates knowledge of individual and cultural differences in the conduct of professional roles	N 1 2 3 4 5

N 1 2 3 4 5	8. Demonstrates the ability to independently apply their knowledge and approach in working effectively with the range of diverse individuals and groups encountered during externship	N 1 2 3 4 5
-------------	---	-------------

COMMUNICATION, INTERPERSONAL, INTERPROFESSIONAL & SKILLS

MIDTERM		FINAL
N 1 2 3 4 5	9. Demonstrates knowledge and respect for the roles and perspectives of other professions	N 1 2 3 4 5
N 1 2 3 4 5	10. Develops and maintains effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services	N 1 2 3 4 5
N 1 2 3 4 5	11. Communicates effectively (direct, clear appropriately) with clients, supervisors and peers	N 1 2 3 4 5
N 1 2 3 4 5	12. Works effectively with significant others (family members, relevant professionals, etc.) to meet client needs	N 1 2 3 4 5
N 1 2 3 4 5	13. Clearly presents and disseminates information to diverse audiences including clients, parents/families, and other professionals	N 1 2 3 4 5
N 1 2 3 4 5	14. Produces and comprehends oral, nonverbal, and written communications that are informative and well-integrated; demonstrates a thorough grasp of professional language and concepts	N 1 2 3 4 5

USE OF SUPERVISION

MIDTERM		FINAL
N 1 2 3 4 5	15. Supervisory Involvement – actively sought supervision, discussed concerns and ideas,	N 1 2 3 4 5
N 1 2 3 4 5	16. Openness to feedback – non defensive, accepts responsibility within one's ability level	N 1 2 3 4 5
N 1 2 3 4 5	17. Demonstrated ability to integrate feedback and used suggestions to improve practice	N 1 2 3 4 5
N 1 2 3 4 5	18. Shows evidence of continued self-evaluation	N 1 2 3 4 5

ETHICAL AND LEGAL STANDARDS

MIDTERM		FINAL
N 1 2 3 4 5	19. Demonstrates knowledge of and acts in accordance with the APA Ethical Principles and Code of Conduct	N 1 2 3 4 5
N 1 2 3 4 5	20. Follows through with tasks and responsibilities in a prompt, well-organized manner	N 1 2 3 4 5
N 1 2 3 4 5	21. Demonstrates knowledge of and acts in accordance with all organizational, local, state, and federal laws, regulations, rules, and policies relevant to health service psychologists	N 1 2 3 4 5
N 1 2 3 4 5	22. Demonstrates understanding of and conformed to ethical principles and legal requirements in professional work and practice	N 1 2 3 4 5

N 1 2 3 4 5	23. Recognizes ethical dilemmas as they arise and applies ethical decision-making processes in order to resolve them	N 1 2 3 4 5
N 1 2 3 4 5	24. Recognizes ethical dilemmas as they arise and applies ethical decision-making processes in order to resolve them	N 1 2 3 4 5
N 1 2 3 4 5	25. Conducts self in an ethical manner in all professional activities	N 1 2 3 4 5

ASSESSMENT SKILLS

MIDTERM		FINAL
N 1 2 3 4 5	26. Demonstrates current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology	N 1 2 3 4 5
N 1 2 3 4 5	27. Demonstrates understanding of human behavior within its context (e.g., family, social, societal, and cultural)	N 1 2 3 4 5
N 1 2 3 4 5	28. Demonstrates the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process)	N 1 2 3 4 5
N 1 2 3 4 5	29. Selects and applies assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics	N 1 2 3 4 5
N 1 2 3 4 5	30. Uses assessment methods that collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment	N 1 2 3 4 5
N 1 2 3 4 5	31. Clearly identifies the nature of the referral problem and the purpose of the assessment	N 1 2 3 4 5
N 1 2 3 4 5	32. Considers cultural and linguistic diversity and other relevant diversity characteristics of the service recipient when choosing assessment tools and strategies	N 1 2 3 4 5
N 1 2 3 4 5	33. Interprets assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective.	N 1 2 3 4 5
N 1 2 3 4 5	34. Demonstrates diagnostic skills (i.e., knowledge of the DSM; use of multiple sources of data to inform diagnosis, etc.)	N 1 2 3 4 5
N 1 2 3 4 5	35. Writes assessment reports that are clear, comprehensive, and accurate	N 1 2 3 4 5
N 1 2 3 4 5	36. Develops appropriate recommendations based on assessment results that are designed to build on client strengths and meet their needs	N 1 2 3 4 5
N 1 2 3 4 5	37. Communicates findings in an accurate and effective manner sensitive to a range of audiences	N 1 2 3 4 5

Appendix I: Comprehensive Exam Case Study Scoring Rubrics

Comprehensive Exam: Assessment Case Study Rubric

Student Name: _____ Date: _____

Reason For Referral	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	The client's area(s) of need is clearly defined. The initial reason for referral is operationalized through collaborative efforts [e.g., with referral source(s)]	The client's area(s) of need is clearly defined -There is some evidence that initial referral is collaboratively defined	The client's area of need is not clearly defined.
Assessment Planning	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	Assessments were purposeful and directly addressed specific questions about client; Selection of assessment tools included examinee factors (e.g., age, cultural, language considerations) Multiple sources of data were considered (e.g., standardized measures, interviews, work samples, progress monitoring data, etc.) that would allow the examiner to address all aspects of the referral concern	Assessments were purposeful and directly addressed specific questions about client; Several sources of data were considered There is some indication that consideration was given to relevant examinee factors	There is limited or no evidence that appropriate instruments and procedures were used
History/ Background Information	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete 0 pts
	All relevant biographical information is clearly stated and accurate. Biographical information/history is comprehensive and includes development, family, education, social support, medical, and anything else that seems pertinent to that client's life history	Some biographical information is included, however lacks breadth and depth. There is some diversity in the areas of the client's life that are discussed.	Some biographical information is included, but information that is pertinent to the client's life is missing.
Conceptualization – Developmental Aspects of Behavior	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete 0
	Details all relevant developmental aspects of behavior such as transitions, growth, developmental stage; Interprets the client's functioning from a developmental frame of reference	Consideration is given to some relevant developmental aspects of behavior	Considerable difficulty identifying relevant developmental aspects of behavior And/Or There is minimal information regarding relevant developmental aspects of behavior
Conceptualization – Affective Aspects of Behavior	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	Details relevant affective aspects of behavior such as affect, mood, and emotions	Consideration is given to some relevant affective aspects of behavior	Considerable difficulty identifying relevant affective aspects of behavior. And/Or There is minimal information regarding relevant affective aspects of behavior

Conceptualization – Biological Aspects of Behavior	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	Details identifies relevant multiple biological underpinnings of behavior, such as neural, physiological, anatomical, and genetic aspects of behavior, as well as current health status, medications, and substance use/abuse.	Consideration is given to some relevant biological aspects of behavior	Considerable difficulty identifying relevant biological aspects of behavior. And/Or There is minimal information regarding relevant biological aspects of behavior
Conceptualization – Social Aspects of Behavior	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	Details relevant social-cultural aspects of behaviors such as group processes, attributions, discrimination, and attitudes, as well as linguistic and cultural diversity	Consideration is given to some relevant social-cultural aspects of behavior	Considerable difficulty identifying relevant social aspects of behavior. And/Or There is minimal information regarding relevant social aspects of behavior
Conceptualization – Cognitive Aspects of Behavior	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	Details relevant cognitive aspects of behavior such as learning, cognitive ability, memory, cognitive processes, and executive functioning.	Consideration is given to some relevant cognitive aspects of behavior	Considerable difficulty identifying relevant cognitive aspects of behavior. And/Or There is minimal information regarding relevant cognitive aspects of behavior
Conceptualization – integration of data	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	Assessment and understanding of client in terms of current status, presenting problems, and strengths are organized meaningfully in terms of multidimensional functioning. Conceptualization demonstrates the ability to integrate hard and soft data related to various aspects of behavior.	Current status and presenting problems consider multidimensional functioning Data from various sources are integrated into a coherent picture of the client.	There is no evidence of data integration
Conceptualization – integration of aspects of behavior	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	-Conceptualization integrates relevant information from multiple aspects of behavior (biological, cognitive, affective, developmental, social and cultural); Offers a functional understanding of and insights into the client beyond behavioral descriptions	Conceptualization integrates relevant information from at least two aspects of behavior (biological, cognitive, affective, developmental, social and cultural); Provides some insight into the client beyond behavioral descriptions	Conceptualization does not include integration of aspects of behavior
Strengths/ Needs	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	Accurately identifies both the strengths and needs of client including relevant cultural, developmental, and environmental factors.	Identification of strengths and needs of client may neglect a few relevant cultural, developmental and environmental factors.	Minimal or no identification of strengths/needs of client; includes few relevant cultural, developmental, and environmental factors.
Treatment/ Educational Planning & Recommendation	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	Recommendations and interventions resulting from the assessment are clearly linked to the issues/concerns identified by the referral question and assessment	Recommendations and interventions resulting from the assessment are clearly linked to the issues/concerns identified by the referral question and assessment results.	Recommendations and interventions resulting from the assessment are not clearly linked to the issues/concerns identified by the referral

	results. Recommendations adequately and appropriately address all areas of concern identified		question and assessment results.
Legal Considerations	-	Proficient: 1	Unsatisfactory/Incomplete: 0
		All aspects of the assessment complied with applicable legal requirements	Assessment does not comply with all applicable legal requirements
Ethical Considerations	-	Proficient: 1	Unsatisfactory/Incomplete: 0
		All aspects of the assessment complied with applicable ethical and professional guidelines	Assessment did not comply with applicable ethical and professional guidelines
Quality of Written Product	Distinguished: 2	Proficient: 1	Unsatisfactory/Incomplete: 0
	The written case study is essentially free of grammatical and typographical errors, Written case study clearly demonstrates the ability to communicate using appropriate professional writing (e.g., APA Style)	The written case study has a few grammatical and/or typographical errors; Writing is generally consistent with professional standards (e.g., APA Style)	The written case study has multiple grammatical and typographical errors; Written product lacks a professional voice Numerous violations of APA Style
Overall Evaluation of Assessment Case Study	Distinguished:	Proficient:	Unsatisfactory/Incomplete
	Pass – Majority of rubric elements rated as distinguished.	Pass – All elements rated as distinguished or proficient.	No Pass – One or more rubric elements rated as unsatisfactory or incomplete.

Comprehensive Exam: Intervention Case Study Rubric

Student: _____ Date: _____

Reason for Referral/Problem Identification	Distinguished: 2	Proficient: 1	Unsatisfactory/Incomplete: 0
	- The client's behavior is clearly identified and the impact on current functioning is clearly described - The client's need(s) is clearly defined within the context of collaborative relationships	- The student behavior is clearly identified - There is some evidence that the client's need(s) is collaboratively defined	-The client's need(s) is not clearly identified.
Problem Analysis – Hypothesis Generation	Distinguished: 2	Proficient: 1	Unsatisfactory/Incomplete: 0
	- Multiple hypotheses regarding client challenges/ behavior are generated - Hypotheses consider all aspects of behavior (biological, cognitive, affective, developmental, social/cultural)	-Some hypotheses are generated regarding client challenges/ behavior -Hypotheses consider several aspects of behavior (biological, cognitive, affective, developmental, social/ cultural)	- Hypotheses are not generated or lack depth/breadth
Problem Analysis – Data Collection	Distinguished: 2	Proficient: 1	Unsatisfactory/Incomplete: 0
	- Multiple sources of data are used to inform the problem analysis; - Assessment data is used to support or rule out hypotheses	-More than one source of data was considered; -Appropriate data are collected to confirm or reject the proposed hypotheses. Appropriate data include one or more of the following: record review, interview, observation, testing, and self-report	- There is limited or no evidence that data was collected/considered in problem analysis
Conceptualization – Major Bases of Behavior	Distinguished: 2	Proficient: 1	Unsatisfactory/Incomplete: 0
	- Conceptualization includes consideration of all major bases of behavior (developmental, affective, biological, social, cultural, and cognitive)	- Conceptualization includes consideration of some major bases of behavior (developmental, affective, biological, social, cultural, and cognitive)	-Minimal information about or conceptualization lacks consideration of major bases of behavior (developmental, affective, biological, social, cultural, and cognitive)
Conceptualization – integration of data and aspects of behavior	Distinguished: 2	Proficient: 1	Unsatisfactory/Incomplete: 0
	- Understanding of client in terms of current status, presenting problems, and strengths are organized meaningfully in terms of multidimensional functioning. -Conceptualization includes integration of major bases of behavior	- Basic understanding of client conceptualization is demonstrated but integration lacks depth and breadth	-Conceptualization does not include an integration of major bases of behavior
Treatment Planning – Data		Proficient: 1	Unsatisfactory/Incomplete: 0

Based Decision-making		-Intervention(s) selection is based on data from problem analysis and hypothesis testing - Treatment goals are connected to the data -- Treatment goals are stated in observable and measurable terms;	- Intervention(s) selection is not based on data from problem analysis and hypothesis testing -Goals are not stated in observable and measurable terms
Treatment Planning – Empirical Support		Proficient: 1	Unsatisfactory/ Incomplete: 0
		Intervention(s) is technically sound and demonstrates knowledge of relevant evidence based interventions and programs.	Intervention(s) is not evidence-based (e.g., research literature, functional analysis, single case design analysis)
Treatment Planning – Other Considerations		Proficient: 1	Unsatisfactory/ Incomplete: 0
		-Intervention(s) reflects sensitivity to individual differences, resources, classroom practices, and other system issues; - Consideration of logistics (e.g., setting, time, resources, personnel) is included in the intervention plan	-Intervention(s) does not appear to consider individual differences, resources, classroom practices, and other system issues; - There appears to be no consideration of logistics (e.g., setting, time, resources, personnel) in the intervention plan
Intervention Evaluation – Progress Monitoring	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0
	- Progress monitoring data are charted and include student performance trend lines, and/or goal lines	- Intervention is monitored and data are provided to ensure that it is implemented as designed	- No progress monitoring data provided
Intervention Evaluation – Outcome Data		Proficient: 1	Unsatisfactory/ Incomplete: 0
		-Outcome data related to progress towards treatment goals are presented	-No outcome data are presented
Intervention Follow-up	Distinguished: 2	Proficient: 1	Unsatisfactory/ Incomplete: 0 pts
	- Modifications for future interventions are considered based upon collaborative examination of effectiveness data - Strategies for follow-up are developed and implemented	- Suggestions for follow-up are developed (e.g., continued progress monitoring, transition planning)	- Suggestions for follow-up are not developed
Legal Considerations		Proficient: 1	Unsatisfactory/ Incomplete: 0

		- All aspects of the assessment complied with applicable legal requirements	- Assessment does not comply with all applicable legal requirements
Ethical Considerations		Proficient: 1	Unsatisfactory/Incomplete 0
		- All aspects of the assessment complied with applicable ethical and professional guidelines	- Assessment did not comply with applicable ethical and professional guidelines
Quality of Written Product	Distinguished: 2	Proficient: 1	Unsatisfactory/Incomplete: 0
	-The written case study is essentially free of grammatical and typographical errors, - Written case study clearly demonstrates the ability to communicate using appropriate professional writing	- The written case study has a few grammatical and/or typographical errors; - Writing is generally consistent with professional standards	- The written case study has multiple grammatical and typographical error; - Written product lacks a professional voice
Overall Evaluation of Intervention Case Study	Pass – Majority of rubric elements rated as distinguished.	Pass – All elements rated as distinguished or proficient.	No Pass – One or more rubric elements rated as unsatisfactory or incomplete.

Appendix J: Legal/Ethical Case Study Evaluation

Form

Comprehensive Exam: Law and Ethics Case Study Rubric

Minimum Level of Achievement: Score of Proficient/Good on all elements

	Excellent	Proficient/Good	Unsatisfactory
Dilemma & Rationale	An ethical dilemma in school psychology was effectively presented (included all pertinent details, facts and information) with a strong rationale	Clear ethical dilemma was presented with adequate rationale.	Case was not a clear ethical dilemma
APA ethical standards	All relevant APA ethical standards were reviewed within the context of this dilemma	Most relevant APA ethical standards were reviewed within the context of this dilemma	A substantial number of APA ethical standards were not reviewed within the context of this dilemma
NASP ethical standards	All relevant NASP ethical standards were reviewed within the context of this dilemma	Most relevant NASP ethical standards were reviewed within the context of this dilemma	A substantial number of NASP ethical standards were not reviewed within the context of this dilemma
Decision Making Model	An ethical decision- making model was clearly described and applied	An ethical decision- making model was applied	It was not clear that an ethical decision- making model was applied
Laws/Legal Considerations	All relevant laws were referenced and applied	Most relevant laws were referenced and applied	A substantial number of relevant laws were not referenced and applied
Conclusions	Conclusions were based on an integrated analysis of law and ethics; includes a describes of how decision maximizes the benefit and minimizes the risk for everyone involved	Conclusions were based on consideration of relevant laws and ethical standards	No clear connection between conclusions and law and ethics was presented
Implications	Implications for both research and practice are discussed	Implications for practice are discussed	Implications not adequately addressed
Quality of Written Product	The written case study is essentially free of grammatical and typographical errors; Written case study clearly demonstrates the ability to communicate using appropriate professional writing (e.g., APA Style)	The written case study is essentially free of grammatical and typographical errors, Writing is generally consistent with professional standards (e.g., APA Style)	The written case study has multiple grammatical and typographical errors; and/or Written product lacks a professional voice; Numerous violations of APA Style
Overall Rating	Pass with Distinction: The majority of elements rated as Excellent	Pass: All elements rated as Good or Excellent	No Pass: One or more elements rated as Unsatisfactory

Appendix K: Internship Agreement

University of Colorado Denver

School of Education & Human Development
Downtown Denver Campus

Campus Box 106, P.O. Box 173364
Denver, Colorado 80217-3364
Phone: (303) 315-6315, Fax: (303) 315-6349

DOCTORAL SCHOOL PSYCHOLOGY INTERNSHIP AGREEMENT

As the primary supervisor of _____ (name of the UNIVERSITY OF COLORADO DENVER doctoral intern),

I _____ (name of primary supervisor),
agree to provide a doctoral psychology internship training experience for the intern at the following internship site:

NAME OF SITE: _____

ADDRESS OF SITE: _____

PRIMARY SUPERVISOR PHONE: _____

PRIMARY SUPERVISOR EMAIL ADDRESS: _____

The term of this contract shall be from _____ (mo/day/yr) to
_____ (mo/day/yr) unless terminated by either party with reasonable and
advance notice to the other.

The purpose of this internship experience is to socialize the intern with respect to professional psychology, and develop intern knowledge, skills, and dispositions in order to practice independently as a psychologist. Internships are designed to be sequential, cumulative, and graduated in complexity. As such, there will be increased expectations for the interns' performance in the core competencies as their knowledge, experience, and expertise grow and develop. This internship experience is also intended to further develop intern knowledge and skills associated with the School Psychology Program competencies of Ethical and Legal Standards; Individual and Cultural Diversity; Professional Values, Attitudes, and Behaviors; Communication and Interpersonal Skills; Assessment; Intervention; Consultation and Interprofessional/Interdisciplinary Skills; Supervision; and Research (as applied to practice). By meeting the guidelines below, this internship also meets the "Guidelines for Defining an Internship or Organized Health Service Training Program in Psychology" according to the National Register of Health Service Providers in Psychology. If the Site is not able to provide the Intern with the training experience agreed to below, the Site will notify the University Internship Supervisor.

The Internship Site and Supervisor Agrees:

1. The internship is an organized program of training that is sequential, cumulative, and graduated in complexity and is characterized by greater breadth and depth than the practicum experience designed to meet the needs of the Intern, and providing an extension of education and supervised training from the university program.
2. The internship agency employs a clearly designated doctoral-level psychologist, who:
 - (a) is currently licensed by the state regulatory board of psychologist examiners to practice at the independent level;
 - (b) has at least three years of experience as a psychologist and has been employed with the agency/district for at least one year prior to assuming supervisory responsibilities for an intern is required; and

(c) serves as primary supervisor and is responsible for the integrity and quality of the internship program.

3. The internship agency has at least two psychologists on staff available as supervisors, at least one of whom is actively licensed as a psychologist by the state regulatory board of psychologist examiners. However, internship agencies such as school districts that have the capacity for only one staff psychologist may meet the spirit of this criterion (breadth of training experience) by entering into consortium agreements with other agencies, such as other school districts or university doctoral programs. For example, a district with only one licensed psychologist on staff may partner with another district or community agency that has licensed psychologists for this purpose. Such consortium agreements must ensure supervision of the intern by two or more school psychologists, one of whom is actively licensed to practice at the independent level by the state regulatory board of psychology and who provides at least half of the required internship supervision.

4. The internship consists of a range of activities including assessment, evidence-based intervention, consultation, program development and program evaluation, counseling, applied research designed to meet the psychological, educational, and health needs of the clients, prevention and development of system supports and increasing capacity with culturally and linguistically diverse populations. Interns are expected to participate in tasks appropriate to the completion of the internship training plan. The intern will not be asked to serve in any capacity other than that for which she or he was appointed.

5. The internship includes a minimum of 1,500 hours in activities described above.

6. The internship includes at least 600 hours in a school setting, as required by NASP and the Colorado Department of Education. This requirement is waived for Interns who are credentialed school psychologists or who have previously completed 600 supervised internship hours in a school-based site under the supervision of a doctoral level school psychologist.

7. The intern, whether full-time or part-time, spends at least 25% of his or her time in providing direct (face-to-face) psychological services to clients, patients or consultees, such as teachers or other mental health service providers, which translates to a minimum of 375 hours out of 1500 doctoral internship hours.

8. The full-time internship includes at least two hours per week of regularly scheduled individual supervision by a doctoral level psychologist licensed for practice at the independent level with the specific intent of evaluating the psychological services rendered directly by the intern and supporting the intern in the role of psychological service provider.

9. In addition to the individual supervision, the intern spends at least two additional hours per week in scheduled group or individual supervision, conducted by an appropriate credentialed school psychologist or other mental health professional.

10. Intern supervision is provided by staff members of the internship agency or by qualified affiliates of the agency who carry clinical responsibility for the cases being supervised.

11. The internship agency provides a dated written statement, brochure, or website that describes the goals and content of the doctoral internship program, states clear expectations for the quality of Interns' work, training, and supervision, and is made available in advance to prospective interns.

12. The internship agency provides a written statement outlining the agency expectations regarding the quantity and quality of the Intern's work and that includes information regarding salary, benefits, reimbursable travel, holidays, and other relevant data.

Internship compensation/stipend: \$ _____

Benefits: _____

Reimbursable travel: _____

Holidays: _____

Other relevant data: _____

- 13.** Interns receive a formal, written evaluation minimally at the end of each university semester using the form provided by the University of Colorado Denver School Psychology Program.
- 14.** Communication between doctoral training programs and internship programs is of critical importance to the overall development of competent psychologists. Therefore, intern performance is discussed among the training partners: the internship site and the university.
- 15.** Due process procedures for interns are made available to interns prior to the beginning of the training period. If due process procedures are initiated, the University of Colorado Denver Program Director will be notified by the site supervisor.
- 16.** Full-time internships are completed in no less than 10 months and part-time internships extend to no more than 24 months.
- 17.** Internship agencies and the intern's university training program jointly issue to the intern written documentation (e.g., a certificate, letter, or "Certificate of Completion") reflecting successful completion of the psychology doctoral internship.
- 18.** The intern engages in research activity, such as the evaluation of services delivered and the effectiveness of the intern's own training.
- 19.** The internship agency has two or more interns engaged in training at the same time. However, agencies having the capacity for only one intern may meet the spirit of this criterion (i.e., socialization of doctoral-level psychology interns) by having regularly scheduled and documented training activities with psychology interns at other sites in the immediate geographic area or, when internship sites are at a significant distance from each other, by making arrangements for regularly scheduled meetings of interns for several hours on a monthly basis.
- 20.** The intern has regularly scheduled, supervised, and documented training activities with other doctoral psychology interns/trainees such as professional development/in-service training; case conferences involving a case in which an intern is actively involved; seminars dealing with professional issues; or observing delivery of health, educational, and/or child/adolescent services.
- 21.** Internship supervision may be provided through synchronous audio and video format where the supervisor is not in the same physical facility as the intern. Programs utilizing any form of telesupervision should have a formal policy that includes procedures to address issues of non-scheduled consultation, crisis coverage, and handling of privacy and confidentiality. These policies and procedures are established in advance and shared among the training program, the internship site, and the intern(s). Internships using telesupervision adhere to best practices and ethical, legal, and professional guidelines.
- 22.** Reports and documents prepared by the doctoral intern for consumers, other agency or school personnel, or other relevant publics are co-signed by the licensed supervisor for the intern.
- 23.** The Intern has a title such as "intern," "resident," or other designation of Intern status.
- 24.** To inform the University of changes in internship Site policies, procedures and staffing that might affect the internship experience.
- 25.** That the supervisor and intern will follow all legal and ethical codes of the profession as outlined by APA and NASP.
- 26.** Consistent with the availability of resources to employed staff, the intern is provided adequate supplies and materials to carry out the functions of the internship. An appropriate work environment should include adequate privacy of office facilities, and access to administrative assistance, telephone services, office equipment and copying machines.

The University Agrees To:

1. Be actively involved in coordinating supervisory experiences during the internship. The university will maintain contact with the intern and the Site to ensure that duties and responsibilities are being met. As such, the University and its designated representative will be involved in any problems that arise between the intern and the internship Site. The University shall be notified immediately when a problem occurs, and the University shall work in conjunction with the internship agency in any subsequent decisions that affect the intern.
2. The University will also maintain a General Liability insurance policy that will include Professional Liability of the Intern.
3. University supervisors will act as a liaison between the Site and the University and will provide at least three field-based contacts during the internship experience.

The Intern Agrees To:

1. Act in accordance with the professional ethical codes of APA and NASP. Additionally, the intern is expected to comply with all policies and procedures of the internship Site and is expected to maintain confidentiality of all records and client information.
2. Obtain professional liability insurance prior to starting internship.
3. Develop an internship plan to be approved by the University internship supervisor. It is expected the plan will be consistent with program aims and guidelines as contained in the Program Handbook and with the internship training standards of outlined in this agreement.
4. Prepare a log of professional experiences that is reviewed by the Site supervisor on a weekly basis, and is submitted electronically for review by the University supervisor on a monthly basis.
5. Complete one behavioral case studies that align with NCSP requirements.
6. Initiate contact with the Site or university supervisors as required or needed.
7. Participate in the University-based internship seminar on a monthly basis.

Appendix L: Internship Plan Template

UNIVERSITY OF COLORADO DENVER
School Psychology Program
Doctoral Internship Plan

All interns placed at non-accredited internship sites must develop an internship plan in cooperation with their internship supervisor at the start of the internship. The intern, site supervisor, and university supervisor must all approve this plan. Interns who are not completing an internship in a traditional school setting must identify internship goals and activities that address the program aims and competencies as they apply to the internship setting. Internship plans must be submitted for approval within the first two weeks of the start of internship.

Intern Name: _____ **Date Form Completed:** _____

CU Denver Doctoral Internship Coordinator: _____ **License #:** _____

Email: _____ **Phone #:** _____

INTERNSHIP INFORMATION

Primary Internship Site Name & Address:

Secondary Internship Site Name & Address:

Please adjust your internship plan according to whether you have one or two sites.

SUPERVISION

Primary Site Supervisor: _____ **License #:** _____

Secondary Site Supervisor: _____ **License #:** _____

Additional Site Supervisor: _____ **License #:** _____

Additional Site Supervisor: _____ **License #:** _____

For the following section, verify that each requirement will be met. Note: These must all be checked in order for the internship opportunity to meet requirements of approved sites.

For every 40 hours of Internship Experience:

- _____ At least 2 hours of individual supervision by a licensed psychologist (face-to-face or tele-supervision)
- _____ At least 2 hours of Other Types of Supervision (e.g., individual or group supervision)
- _____ Regularly scheduled learning activities such as didactic seminars, inservices, grand rounds, etc.
- _____ At least 25% of the internship experience is direct client contact
- _____ At least 50% of supervision is provided by licensed psychologist(s) with at least 3 years post-licensure experience.
- _____ Direct observation of the intern as a means of evaluating performance and guiding supervision at least once per evaluation period

Topics to be covered in supervision include:

- ☐ Discussion of services provided by the student;
- ☐ Selection of service or intervention plans for and review of cases or work units of the student;
- ☐ Discussion of and instruction in the use of progress monitoring and outcome data to inform decision-making
- ☐ Discussion of and instruction in theoretical concepts underlying the work;
- ☐ Discussion of and instruction in relevant psychological foundations underlying the work;
- ☐ Discussion of the management of professional practice and other administrative or business issues;
- ☐ Evaluation of the supervisory process by the student and the supervisor;
- ☐ Discussion of coordination of services among the professionals involved in the particular cases or work units;
- ☐ Discussion of relevant state laws and rules;
- ☐ Discussion of ethical principles including principles applicable to the work;
- ☐ Review of standards for providers of school psychological services; and
- ☐ Discussion of reading materials relevant to cases, ethical issues and the supervisory process.

Schedule of Doctoral Internship

Year(s) of Internship Placement: _____

Internship Schedule Site #1 (Days & Hours): _____

Start Date: _____ **Anticipated End Date:** _____

Minimum Number of Hours to be On-Site per Week: _____

Paid? YES NO (circle) If paid, amount: _____

Internship Schedule Site #2 (Days & Hours): _____

Start Date: _____ **Anticipated End Date:** _____

Minimum Number of Hours to be On-Site per Week: _____

Paid? YES NO (circle) If paid, amount: _____

GOALS OF TRAINING (Attach additional sheet(s):

- You need to highlight the organized sequence of your internship program.
- Discuss how the internship is going to gradually *increase* and *build* upon your foundational knowledge and skill set over the course of the training year.
- Please outline all the duties you will be expected to do throughout the internship training, clearly indicating the nature of the activities and any related training. The table below may be helpful in this regard.
- It is recommended that you use the CU Denver Internship Evaluation Form to inform the writing of your goals. It might also be helpful to review brochures from internship sites of interest to you. Information from school-based sites can be particularly helpful. The APPIC website is a good resource (<https://www.appic.org/>). Once you find a site, look for their program brochure and use that as a model. The information below should also be considered.

The following are considered integral to the practice of school psychology. They are the skills the intern is learning to coordinate, manage and improve as they become independent. There should be opportunity to participate in ALL of the areas, with at least 10% and no more than 50% of the intern time in either

Assessment, Intervention, or Consultation. Services to children and youth should include various ages, cultural backgrounds and presenting problems/disabilities.

Assessment (formal/informal)	Family collaboration/intervention
Observation in natural environments	Inservice or other presentations
Counseling (individual/group)	Research/program evaluation
Academic intervention/Instructional consultation	Mental health consultation
Behavior analysis and intervention	Interagency case management
Crisis intervention/prevention	Educational/treatment planning
System-level prevention/intervention	Other:

The intern's competencies in each of the following areas will be assessed:

- Foundation in basic tenets of psychology (affective biological, cognitive, & social bases of behavior, human development)
- Assessment & data-based decision making
- Collaborative and consultative interventions
- Direct interventions, mental health services, and instructional supports
- Application of research to professional practices
- Culturally responsive, legal, ethical and professional practice
- Communication and interpersonal skills
- Professional values, attitudes, and behaviors

All parties have read and understand the agreement outlined in this student's doctoral internship plan.

The signatures below indicate that each party has agrees with the proposed internship plan.

Then you need to sign and have all supervisors sign the last page of your internship plan:

Appendix M: Internship Evaluation Form

UNIVERSITY OF COLORADO DENVER
School Psychology Program
Intern Performance Evaluation

Student Name: _____

Primary Supervisor Name: _____

Supervisor Phone: _____ Supervisor Email: _____

Placement Site: _____

Secondary Supervisor Name: _____

Supervisor Phone: _____ Supervisor Email: _____

Additional Placement Site (if applicable): _____

Date of Midterm Evaluation: _____ Date of Final Evaluation: _____

Directions: This performance evaluation is designed to promote ongoing constructive evaluation of critical professional competencies and to provide formative feedback to facilitate the development of our students' mastery of critical professional skills and competencies. This evaluation form is broken into two parts. In Part I, please circle the rating number associated with your trainee's current behavior. If you want to elaborate on a specific area, please feel free to write comments at the end of each section. There are no sharply defined lines between these ratings and assigned grades since professional development and growth is a continuous process. Thus, students at any specific level may have ratings both above and below average on critical performance skills. In Part II, please add your open-ended comments to each evaluation item and provide specific behavioral examples to support your comments.

Methods used in evaluating competency (check all that apply):

_____ Direct Observation (*required*) _____ Review of Audio/Video _____ Case Presentation

_____ Documentation Review _____ Supervision _____ Comments from other staff/faculty

Part I Directions: Please use the following four-point rating scale to evaluate the Internship student's skill development. Circle or highlight the rating for each item. For those areas where you have had no opportunity to observe or the skill is not applicable to the setting, circle NO (option for Mid-term Evaluation Only).

NOTE: WHITE rating area is for your MID-TERM evaluation

GREY rating area is for your FINAL evaluation

STUDENT IS RESPONSIBLE FOR RETAINING THIS FORM

4 – Proficient/Expert: Demonstrates exceptional skills in this area; similar to a seasoned practitioner

3 – Competent: Demonstrates independence in this area; ready for independent practice.

2 – Advanced Beginner: Beginning to demonstrate independence in task completion with supervision.

1 – Novice: Needs substantial improvement in this area; requires close supervision in this area

NO – No Opportunity to observe student in this area (**option for mid-term only**)

As indicated above, “3” is anchored as “Competent”, i.e., the level expected at the end of internship and that of beginning professional psychologists, so students are expected to be ranked at a 3 or 4 in all areas by the end of internship. At mid-term, the MLA is a 2.

NOTE: This form is designed to provide interns with comprehensive, formal feedback on strengths and areas for growth. A score less than 2 at *midterm* will trigger the development of a remediation Plan.

A score of less than 3 on an individual learning element or broad competency on the *final* evaluation will initiate the program's Due Process procedures. Interns must receive a rating of 3 or higher on all learning elements and broad competencies to demonstrate that they are prepared for entry-level independent practice and licensure, and to successfully complete the internship.

APA Profession Wide Competencies

Competency Area: Intervention	Rating (circle)
Establishes and maintains effective relationships with the recipients of psychological services	1 2 3 4 NO N/A
Develops evidence-based intervention plans specific to service delivery goals	1 2 3 4 NO N/A
Implements interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables	1 2 3 4 NO N/A
Demonstrates the ability to apply the relevant research literature to clinical decision making	1 2 3 4 NO N/A
Modifies and adapts evidence-based approaches effectively when a clear evidence-base is lacking	1 2 3 4 NO N/A
Evaluates intervention effectiveness and adapts intervention goals and methods consistent with ongoing evaluation	1 2 3 4 NO N/A
AVERAGE SCORE FOR BROAD AREA OF COMPETENCE:	1 2 3 4
Comments:	
Competency Area: Assessment	
Demonstrates current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology	1 2 3 4 NO N/A
Demonstrates understanding of human behavior within its context (e.g., family, social, societal, and cultural)	1 2 3 4 NO N/A
Demonstrates the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process	1 2 3 4 NO N/A
Selects and applies assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient	1 2 3 4 NO N/A
Interprets assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective	1 2 3 4 NO N/A
Communicates findings in an accurate and effective manner sensitive to a range of audiences	1 2 3 4 NO N/A
AVERAGE SCORE FOR BROAD AREA OF COMPETENCE:	1 2 3 4
Comments:	
Competency Area: Ethical and Legal Standards	
Demonstrates knowledge of and acts in accordance with the APA Ethical Principles and Code of Conduct	1 2 3 4 NO N/A
Demonstrates knowledge of and acts in accordance with all organizational, local, state, and federal laws, regulations, rules, and policies relevant to health service psychologists	1 2 3 4 NO N/A

Demonstrates knowledge of and acts in accordance with all professional standards and guidelines	1 2 3 4 NO N/A
Recognizes ethical dilemmas as they arise and applies ethical decision-making processes in order to resolve them	1 2 3 4 NO N/A
Conducts self in an ethical manner in all professional activities	1 2 3 4 NO N/A
AVERAGE SCORE FOR BROAD AREA OF COMPETENCE:	1 2 3 4 NO N/A
Comments:	
Competency Area: Cultural and Individual Diversity	Rating (circle)
Demonstrates an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves	1 2 3 4 NO N/A
Demonstrates knowledge of the current theoretical and empirical knowledge base as it relates to diversity as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service	1 2 3 4 NO N/A
Integrates knowledge of individual and cultural differences in the conduct of professional roles	1 2 3 4 NO N/A
Demonstrates the ability to independently apply their knowledge and approach in working effectively with the range of diverse individuals and groups encountered during internship	1 2 3 4 NO N/A
AVERAGE SCORE FOR BROAD AREA OF COMPETENCE:	1 2 3 4 NO N/A
Comments:	
Competency Area: Professional Values, Attitudes, and Behaviors	Rating (circle)
Behaves in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others	1 2 3 4 NO N/A
Engages in self-reflection regarding one's personal and professional functioning; engages in activities to maintain and improve performance, well-being, and professional effectiveness	1 2 3 4 NO N/A
Actively seeks and demonstrates openness and responsiveness to feedback and supervision	1 2 3 4 NO N/A
Responds professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training	1 2 3 4 NO N/A
AVERAGE SCORE FOR BROAD AREA OF COMPETENCE:	1 2 3 4 NO N/A
Comments:	
Competency Area: Consultation and Interprofessional / Interdisciplinary Skills	Rating (circle)
Demonstrates knowledge and respect for the roles and perspectives of other professions	1 2 3 4 NO N/A
Applies knowledge about consultation in direct or simulated (e.g. role played) consultation	1 2 3 4 NO N/A
AVERAGE SCORE FOR BROAD AREA OF COMPETENCE:	1 2 3 4 NO N/A
Comments:	

Competency Area: Communication and Interpersonal Skills						
Develops and maintains effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
Produces and comprehends oral, nonverbal, and written communications that are informative and well-integrated; demonstrates a thorough grasp of professional language and concepts	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
Demonstrates effective interpersonal skills and the ability to manage difficult communication well	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
AVERAGE SCORE FOR BROAD AREA OF COMPETENCE:	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
Comments:						
<u>Supervision</u>						
Apply knowledge of supervision models and practices in direct or simulated practice with psychology trainees, or other health professionals. Examples of direct or simulated practice examples of supervision include, but are not limited to, role-played supervision with others, and peer supervision with other trainees	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
Comments:						
<u>Research</u>						
Demonstrates the substantially independent ability to critically evaluate and disseminate research or other scholarly activities (e.g., case conference, presentation, publications) at the local (including the host institution), regional, or national level	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
Comments:						
<u>Program Specific Competencies</u>						
Demonstrates knowledge of general education, special education, educational and related services, including how the system works as a whole	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
Demonstrates skill in identifying individuals or groups, ages birth to twenty-one, who may benefit from targeted interventions, instructional supports, and psychological services, using screening, progress monitoring, and other tools.	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
Demonstrates the ability to plan and implement interventions at different level (e.g. individual, group, classroom, and systems level), including positive behavioral supports (e.g. classroom accommodations, FBAs, etc.).	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A
Demonstrates an understanding of school-based crisis intervention strategies (e.g., suicide risk assessment, threat assessment, crisis response, etc.) and provides crisis intervention as needed.	1	2	3	4	NO	N/A
	1	2	3	4	NO	N/A

Intern Performance Evaluation – Part II

Part II Directions: Please elaborate on each item and provide specific behavioral examples.

1. Major accomplishments/achievements in the areas of assessment, consultation, intervention, and personal/professional development.

Midterm:

Final:

2. Areas of demonstrated strength.

Midterm:

Final:

3. Areas needing improvement or enhancement.

Midterm:

Final:

4. Specific steps, actions, and/or experiences that will be taken to further address areas in need of improvement or enhancement.

Midterm:

Final:

I acknowledge that my supervisor has reviewed this evaluation with me.

Appendix N: Professional Practice Case Study Evaluation Form

Professional Practice Case Study Rubric

Scoring Criteria		
Standard	Effective (1 point)	Needs Development (0 points)
Client Demographics 1.1	Demographics of the case are adequately described (e.g., age, type of class/school, grade, SES, disability, etc.).	Demographic information does not include sufficient information.
Consideration of Client Unique Characteristics 1.2	Assessment, intervention, and/or consultation practices consider unique individual characteristics.	Needs Development - Assessment, intervention, and/or consultation practices do not consider unique individual characteristics
Collaboration 1.3	Collaboration with relevant stakeholders (e.g., parents, teachers, and other professionals) is evident throughout the process.	Decisions regarding problem identification and intervention are made without consultation with relevant stakeholders.
Problem Solving Process 1.4	Steps of the problem-solving process are implemented coherently (i.e., sequential, goal directed, and flow logically based on evidence).	The steps of the problem-solving process are not followed.
Professional Writing 1.5	Professional practices of writing style, formatting, and graphing are present in the case study (i.e., clear succinct and well written text with clearly labeled graphs).	Errors in writing convention, style, and graphing interfere with readability and interpretation of data.
Protection of Client Privacy 1.6	Personal identifying information of the case study subject is redacted from the report.	Personal identifying information is not redacted from the report.
Problem Identification, 2.1	Information is gathered from multiple sources (e.g., Record review, Interview, Observation, and Testing [RIOT]).	Data are not gathered from multiple sources.
Problem Identification, 2.2	The problem is operationally defined in observable, measurable terms (i.e., the referral concern is restated as an observable, measurable dependent variable).	The problem is not operationally defined. (e.g., it is reported as a categorical/descriptive cause such as Autism, Depression, ADHD; or terms such as aggression, anxiety or hyperactivity).
Problem Identification, 2.3	Expectations for the identified behavior are stated based upon an appropriate source for comparison (e.g., grade level standards, peer performance, normative data, etc.).	Expected performance is not based on an appropriate source for comparison or is not included OR The difference between actual and expected levels of performance is not explicitly stated
Problem Identification, 2.4	The difference between actual and expected levels of performance is explicitly stated or described using baseline data.	Baseline data not provided and/or no difference between actual and expected levels of performance is stated.
Problem Analysis, 3.1	The problem behavior is hypothesized as a skill or performance deficit AND	There is no hypothesis regarding skill or performance deficit. OR

	Data are used to test the hypothesis.	Data are not used to test the hypothesis
Problem Analysis, 3.2	Using existing data, multiple, testable hypotheses to identify the cause of the problem are described.	Multiple hypotheses are not developed OR Hypotheses are untestable
Problem Analysis, 3.3	Each hypothesis is stated in observable/measurable terms.	Hypotheses are not stated in observable/measurable terms
Problem Analysis, 3.4	Hypotheses are empirically tested and/or other sources of data are used to confirm or reject each hypothesis.	Hypotheses are not tested or appropriate sources of data are not used to confirm or reject each hypothesis
Problem Analysis, 3.5	A conclusive statement that formally describes the cause of the problem and leads to a logical intervention (e.g., evidence-based, linked to the data, etc.) is included.	A conclusive statement formally describing the cause of the problem is not included OR Does not lead to a logical intervention.
Intervention, 4.1	A single evidence-based intervention is implemented and linked to preceding sections with at least one citation included.	Intervention is not evidence-based (no research citations(s)). OR Is not linked to preceding sections OR Multiple interventions are implemented simultaneously.
Intervention, 4.2	Acceptability of the intervention by relevant stakeholders (e.g., caregivers, teachers, etc.) is verified.	Acceptability of the intervention by one or more stakeholders is not verified
Intervention, 4.3	The intervention is replicable: Intervention components are clearly described (i.e., independent variable) AND Logistics are reported (e.g., who will implement, setting, duration and frequency of sessions, etc.)	The intervention is not replicable: Intervention components are not described (i.e., independent variable) OR Logistics are missing (e.g., who will implement, setting, duration and frequency of sessions, etc.)
Intervention, 4.4	Skill or performance goals are: Described using the same metric as the dependent variables AND Achievable based on research or other data.	Skill or performance goals are: Described using a different metric as the dependent variables OR Not achievable or not linked to research or other data.
Intervention, 4.5	Progress is monitored and graphed for data based decision making (formative evaluation).	Progress is not monitored. OR Progress data are not graphed.
Intervention, 4.6	Treatment integrity/fidelity data are: Collected and reported AND Used in the interpretation of intervention efficacy.	Treatment integrity/fidelity data are not: Collected or reported OR Used to describe intervention efficacy
Evaluation, 5.1	A single graph is depicted for the target behavior and includes the following elements: Baseline data AND Goal/Target indicator or aim line AND Treatment/progress monitoring data with	A single target behavior is presented on multiple graphs or relevant graphs are not included. The following components are not included in the graph: Baseline data OR Goal/Target indicator or aim line

	a trend line.	OR Treatment/progress monitoring data with a trend line.
Evaluation, 5.2	Adequate intervention data (i.e., typically 7 data points over six weeks) are collected to demonstrate level and/or trend under intervention conditions.	Insufficient data are collected to meaningfully interpret the results of the intervention
Evaluation, 5.3	Visual analysis of the level, trend and variability and/or statistical analyses (e.g., effect size) demonstrate that the intervention was effective.	Visual or statistical analyses were not used OR The Intervention was ineffective
Evaluation, 5.4	Strategies for generalizing outcomes to other settings are described.	Strategies for generalizing outcomes to other settings are not described.
Evaluation, 5.5	Strategies for follow-up are developed.	Strategies for follow-up are not developed.
Overall Evaluation	Case study meets the minimum level of achievement (MLA) required to demonstrate competency (80% or 21/26 points)	.Case study does not meet MLA of at least 80% of above elements

Comments:

Total points _____/26

(Students must achieve a minimum of 21 (at least 80%) indicating overall proficiency. If you do not meet this level of proficiency, your case will be returned to you and you will need to make revisions until it is acceptable. If elements are missing that cannot be added (e.g., no baseline data collected), you will need to complete a new case.

Appendix P: Capstone Evaluation Form

Doctor of Psychology in School Psychology
Capstone Evaluation Form

Student's Name: _____

Title of Capstone: _____

Committee Chair: _____

Committee Members: _____

The following rubric is to be used for evaluation of the quality of School Psychology PsyD Capstones. Each chapter of the capstone, to be meet the minimum level of achievement, must achieve, or be rated at Performance Level 3 or 4. Failure to meet these standards requires rewrites until the standards are met.

Chapter 1/ Introduction: Articulation and originality of a question of interest/ Problem statement	 4-Advanced	 3-Proficient	 2-Developing	 1-Beginner
	The problem statement is presented and articulated clearly and uniquely, and its importance to the profession/field is demonstrated. • Meaningful relationships between concepts and/or variables under study are analyzed and add a new perspective on previous research regarding the topic. • A credible argument that the study will uniquely and significantly contribute to knowledge in the field/profession is presented.	The problem statement is presented and articulated in a clear and unique way. • The importance of the research is presented and relationships between concepts and/or variables under study are examined. • A new perspective on previous research is presented.	The problem statement is presented and begins to describe the topic of study. • Shows limited distinctiveness in the area of study. • The importance of the research is minimally presented	The problem statement lacks articulation and does not describe the issue under study. • The problem statement mimics previous work and lacks uniqueness

Chapter 2/ Literature Review	 4-Advanced	 3-Proficient	 2-Developing	 1-Beginner
	Literature review presents in an accurate and comprehensive manner the status of current research literature on the topic under study. • Literature review is synthesized into a research topic or question that has the potential to contribute to knowledge in the field/profession. • Identifies gaps where further research is needed. • Establishes a theoretical framework for investigating those gaps and questions	Literature review presents status of current research literature on the topic under study. • Begins to describe a research topic, question, or hypothesis that has the potential to contribute to knowledge in the field/profession. • Begins to establish a theoretical framework for the current research questions and gaps in literature.	Limited discussion of status and gaps in current research literature on the topic. • Limited establishment of theoretical framework for current research. • Topic, question, or hypothesis is simply stated.	Does not discuss status or gaps in current research literature. • Literature review does not establish a theoretical framework.
Chapter 3/ Methodology	 4-Advanced	 3-Proficient	 2-Developing	 1-Beginner
	An understanding of the methodology's suitability to the dissertation as contribution to knowledge is demonstrated. • Presents and assesses the suitability of the methodology to the topic	Presents a methodology suitable and systematic for the topic.	Limited discussion of suitability of methodology for collection of data.	Does not discuss a methodology for collection of data or developing a product.
Chapter 4/ Results	 4-Advanced	 3-Proficient	 2-Developing	 1-Beginner
	Results of the data collection are presented in an objective manner. • Results of the data analyses use techniques that describe the data and reveal meaningful relationships that exist in the data. • The results are interpreted, which allows for a speculation on	Results are presented in an objective manner. • Results of the data analyses are described limitedly to reveal meaningful relationships that exist in the data.	Results are simply stated in an objective manner.	Does not present results of the data analyses.

	new/hidden relationships.			
Chapter 5/ Discussion & Implications	 4-Advanced	 3-Proficient	 2-Developing	 1-Beginner
	Complete discussion of analysis of results from many different perspectives in a scholarly and objective manner. • Conclusions clearly follow from results, are accurately described in detail in terms of data analysis, and show methodological and conceptual rigor. • Fully accounts for the study's clinical, professional, and academic implications. Understand the place of the study in history and meanings associated with research on topic. Is capable of using the current study as a platform for discussion of the topic globally and historically. • Fully describes possible limitations to research methodology, alternatives for operational definitions of constructs, and possible researcher influences. Connects these limitations clearly to outcomes and results. Designs changes to study that would account for the above-mentioned limitations	Results are analyzed in an objective manner, employing several different perspectives on the same data. • Conclusions follow from results and are explained in terms of the analysis of the data, which shows methodological and conceptual rigor. • Addresses at least two of the following areas: Clinical, professional, or academic implications. • Can describe the significance of the study within the contextual history of research on the topic. • Discusses possible limitations in research methodology. Connects these limitations to results and possible implications of results. • Makes only a limited attempt to describe changes which would strengthen the study	Conclusions follow from the results and are explained in terms of the analysis of the data. • Addresses only one of the following areas: Clinical, professional, or academic implications. • Shows limited awareness of the study's applicability to the topic. • Shows a lack of awareness of at least one major area of limitation in the research methodology and/or findings. • Cannot or does not recognize how the current study may be improved.	An analysis of the results is not present. • Conclusions do not clearly follow from the results. • Does not discuss either the clinical, professional, or academic implications. Shows no awareness of place of current study in the body of knowledge on the topic. • Does not discuss either the limitations of research methodology, findings, or implications of these limitations with regard to the study's efficacy and value.
References & Appendices		 3-Proficient	 2-Developing	 1-Beginner
		Uses in-text	Missing some in-text	Multiple problems

		citations; all references cited on reference page; strong research sources; appendices include all instruments and protocols (if necessary).	citations; some references omitted on reference page; mediocre research sources (e.g. websites instead of published articles); appendices lack instruments, protocols or permission letters	with citations and references and/or multiple missing appendix items.
Academic Writing		☐ 3-Proficient	☐ 2-Developing	☐ 1-Beginner
		Uses own words for clear description; concise style; sentence structure, word choice and professional tone/style are used consistently. Grammar, spelling, punctuation and organization are flawless, appropriate use of quotations; Headings logical and well labeled; spacing & paragraphs appropriate; page numbering accurate; uses appropriate font; APA (6th edition) format is consistent and correct throughout entire paper	Style is inconsistent, relies too much on quotes and/or lacks clarity; uses colloquial language; word choice and style not professional; Minor corrections in grammar, spelling, punctuation, and/or typographical errors; minor syntax or quotation flaws; Minor lapses in format of the paper, including spacing, paragraph use, page number and font; A few errors in APA format and/or citation style.	Does not achieve a coherent, professional style; uses too much colloquial language; too wordy and/or unclear; Multiple errors in grammar, spelling, punctuation, quoting and/or syntax; Significant problems with headings, spacing, paragraphs pagination or font; Significant errors in APA format, or inconsistent application of APA format.
Dissemination of Findings	☐ Presentation	☐ Publication		

Additional Comments:

Appendix Q: SEHD Student Honor Code

SCHOOL OF EDUCATION & HUMAN DEVELOPMENT STUDENT HONOR CODE

The School of Education & Human Development is committed to the Honor Code of the University of Colorado Denver.

A university's reputation is built on a standing tradition of excellence and scholastic integrity. As members of the CU Denver academic community, faculty and students accept the responsibility to maintain the highest standards of intellectual honesty and ethical conduct in completing all forms of academic work and internships associated with the University.

SEHD Student Honor Code

Education at CU Denver is conducted under the honor system. All students entering an academic program should have developed the qualities of honesty and integrity, and each student should apply these principles to his or her academic and subsequent professional career. All students are expected to achieve a level of maturity which is reflected by appropriate conduct at all times. The type of conduct which violates the School of Education & Human Developments Student Honor Code may include but is not limited to the following:

Academic Dishonesty

1. Plagiarism
2. Cheating
3. Fabrication, falsification and deception
4. Multiple submissions
5. Misuse of academic materials
6. Complicity

Violation of any University of Colorado Denver or School of Education & Human Development policy

7. Intoxication
8. Unprofessionalism
9. Disruptive or disorderly conduct or any violation of the Student Code of Conduct

Academic Dishonesty

Students are expected to know, understand, and comply with the ethical standards of the University. In addition, students have an obligation to inform the appropriate official of any acts of academic dishonesty by other students of the University. Academic dishonesty is defined as a student's use of unauthorized assistance with intent to deceive an instructor or other such person who may be assigned to evaluate the student's work in meeting course and degree requirements.

Plagiarism

Plagiarism is the use of another person's distinctive ideas or words without acknowledgment. The incorporation of another person's work into one's own required appropriate identification and acknowledgment, regardless of the means of appropriation. The following are considered to be forms of plagiarism when the source is not noted:

1. Word-for-word copying of another person's ideas or words.
2. The mosaic (the interspersing of one's own words here and there while, in essence, copying another's work).
3. The paraphrase (the rewriting of another's work, yet still using their fundamental idea or theory).
4. Fabrication of references (inventing or counterfeiting sources).
5. Submission of another's work as one's own.
6. Neglecting quotation marks on material that is otherwise acknowledged.

Acknowledgment is not necessary when the material used is common knowledge.

Cheating

Cheating involves the possession, communication, or use of information, materials, notes, study aids or other devices not authorized by the instructor in an academic exercise, or communication with another person during such an exercise. Some examples of cheating include:

1. Copying from another's paper or receiving unauthorized assistance from another during an academic exercise or in the submission of academic material;
2. Using any electronic, or digital, or technological or other device when its use has been disallowed;
3. Collaborating with another student or students during an academic exercise without the consent of the instructor.

Fabrication, Falsification and Deception

Fabrication involves inventing or counterfeiting information, e.g., creating results not obtained in a study or research. Falsification, on the other hand, involves deliberately altering or changing results to suit one's needs in an experiment or other academic exercise. Deception is providing false information or knowingly withholding information.

Multiple Submissions

This is the submission of academic work for which academic credit has already been earned, when such submission is made without instructor authorization.

Misuse of Academic Materials

The misuse of academic materials includes, but is not limited to, the following:

1. Stealing or destroying library or reference materials or computer programs;
2. Stealing or destroying another student's notes or materials, or having such materials in one's possession without the owner's permission;
3. Receiving assistance in locating or using sources of information in an assignment when such assistance has been forbidden by the instructor;
4. Illegitimate possession, disposition, or use of examinations or answer keys to examinations.
5. Unauthorized alteration, forgery, or falsification;
6. Unauthorized sale or purchase of examinations, papers, or assignments.

Complicity in Academic Dishonesty

Complicity involves knowingly contributing to another's acts of academic dishonesty.

Intoxication

This is defined as being under the influence of drugs or alcohol in any University setting, classroom setting, practicum/internship, professional development school/site, computer lab or shared student space that compromises the student's ability to learn and participate in educational activities, interferes with the learning process of other students and/or customers and clients of the School of Education & Human Development. Students who have difficulties with alcohol and/or other substances may seek assistance from services available on campus such as the CU Denver Student/Community Counseling Center.

Unprofessional Behavior

Any conduct including electronic communications, both on and off campus, that interfere with the student's ability to maintain professional standards as defined in program handbooks, professional codes of ethics, University policies or procedures or reflects poorly on the student, School of Education & Human Development or University is prohibited.

Disruptive or Disorderly Conduct

Disruptive or disorderly conduct in any University setting or partner setting, such as the disregard of rights of faculty, staff, administration and peers, threatening behaviors in any medium of communication and sexual harassment are examples of disruptive and disorderly conduct and a violation of the University Code of Student Conduct is prohibited. The Code of Student Conduct can be found by visiting the Office of Community Standards and Wellness website at <https://www.ucdenver.edu/student/health-wellness/student-conduct>.

All proceedings concerned with academic dishonesty are confidential to the extent permitted by law.

A student accused of academic dishonesty has the right to:

- admit to the charges and accept the penalty imposed by the instructor. If the student admits to the charges, the faculty member will invoke an appropriate penalty, which could include the issuance of a failing grade in the course. If the faculty member believes further action is warranted, then the faculty member may request a hearing of the Academic Ethics Committee, which will determine if further action is necessary;
- dispute the charges or the penalty by following the Student Academic Appeal process.

Procedures for faculty encountering academic dishonesty

In order to facilitate the accusation process, it is suggested that faculty members include in their syllabi a statement concerning their policy on matters of academic dishonesty.

- A. A faculty member who suspects that a student may be guilty of academic dishonesty should react quickly. S/he should gather as much evidence as possible as rapidly as possible: e.g. gathering names of and impressions from potential witnesses, listing potential references that may have been plagiarized, or retaining any hard copies of evidence, such as "cheat sheets" or tests that might have been copied and/or copied from. S/he should commit as many details of the incident to writing as quickly as possible as details regarding an incident can be quickly forgotten.
- B. When a faculty member has evidence suggesting that a student is guilty of academic dishonesty, the student should be confronted with the evidence at a meeting, preferably held in the faculty member's office within five (5) working days of the discovery of the alleged incident.

- C. After the meeting described above, the faculty member should determine the appropriate penalty for the act of dishonesty. This penalty, as determined by the faculty member, may be a failing or zero grade for the assignment in question or a failing grade in the course. The penalty should be consistent with any information published in the faculty member's syllabus. If the faculty member feels that issuance of a failing grade is an insufficient penalty, then the faculty member may request a formal meeting the Associate Dean over SEHD academic program.
- D. After determining the appropriate penalty, the faculty member should present the student with a written letter describing the alleged violation. Copies of this letter should be given to the student's faculty advisor, the Associate Dean of academic programs and a copy should be placed in the student's file housed within the Student Services Center.

This letter must include:

- a detailed description of the incident that resulted in the allegation of academic dishonesty;
- a statement of the penalty that will be imposed on the student;
- attachment: The SEHD Student Academic Appeal Process

Procedures for faculty that encounter violations of policies other than academic dishonesty

Violations of the student honor code that are unrelated to academic dishonesty should also be considered serious and reported to the School of Education & Human Development Associate Dean for Academics. The appropriate offices including campus police, CU Denver Office of Community Standards and Wellness and other appropriate offices may be contacted to report the violation. Consequences and outcomes will be determined by the appropriate parties given the severity of the offense.

Appendix R: Office of Graduate Education Academic Grievance and Appeals Process

OFFICE OF GRADUATE EDUCATION ACADEMIC GRIEVANCE AND APPEALS PROCESS

The following procedures address those student appeals and grievances arising from suspension, termination/dismissal, or denial of progression based on unsatisfactory academic performances from the Graduate School or its programs.

The intent of the academic appeal procedure is to assure fairness and due process to all involved parties. Good faith efforts should always be made by students, faculty, and administration to settle all appeals, complaints, and grievances on an informal basis. These efforts will include conferences between the persons directly involved and others whom these persons believe to be able to help solve the problems.

Definitions

Students may find themselves terminated from a graduate program for a number of reasons. Sometimes the language and policies behind the termination can be confusing. These definitions are provided to shed some light on the nuances between terms.

- **Suspension** – Removal of the student from the graduate program for a defined period of time and/or the specification that a student must fulfill certain requirements before readmission or re-instatement will be considered. While suspended the student is not entitled to attend classes, use University facilities, participate in University activities, or be employed by the University. Special conditions may be stipulated for reinstatement at the conclusion of the period of reinstatement of the period of suspension. The student is not in good standing with the University during the term of the suspension.
- **Termination/dismissal** – Terms used synonymously to refer to a student being withdrawn from a graduate program graduate education. Official notification is sent to students by email and US mail. Students terminated have the right to appeal their dismissal in writing within one week per this policy. As with a suspension, the student is no longer entitled to attend classes, use University facilities, participate in University activities, or be employed by the University as a student.
- **Denial of Progress** – Students failing to meet program progression criteria, with course failures, too many incomplete grades, or some other programmatic issue, would fall into this category. Students in this category are may be suspended or terminated/dismissed and be defined by the corresponding criteria above.

Graduate programs and students should have an open communication with one another. Graduate programs have developed programmatic handbooks to assist students through their graduate studies. Students are responsible for following the policies and procedures as outlined 2 in the Office of Graduate Education and program handbooks and rules. Ignorance of the guidelines and procedures will not constitute an affirmative defense in an appeals process.

General Procedures

1. The student should be informed in writing by the relevant instructor, faculty committee, Program Director, or administrator (e.g., Dean or Assistant Dean) that he/she is not meeting the academic requirements to continue in the graduate program. Written notices of course failures, unsatisfactory program progress, and intent to request dismissal or suspension from the Graduate School are distributed to the involved student, the student's academic advisor, the Program Director, the program progression's committee (if present), and the Assistant Dean of the Graduate School.
2. Should the student disagree with the decision made by the faculty, committee, Program Director, or administrator regarding course failure or intent to terminate progression in the program based on unsatisfactory academic performance, the student should initiate a conference with the involved person(s) to determine if the disagreement can be resolved within 2 weeks.
3. If the results of the first conference are not acceptable to the student, the student informs the involved faculty within 1 week and requests a conference with the involved faculty and Program Director or school administrator. NOTE: This step is required only in situations in which the Program Director and/or school administrator have not already approved or concurred with the initial notice of failure or intent to terminate.
4. If the consensus of the program is still that the student should be terminated/dismissed or suspended, the Program Director or Chairperson notifies the Graduate School Assistant Dean and recommends the student's dismissal or suspension. The email or letter outlines the reason for the dismissal or suspension and steps taken to date. If suspension is recommended, the recommendation also includes specific criteria for term of the suspension and requirements for reinstatement.
5. The Assistant Dean will review the student's academic record and submitted information from the program to ensure that the student has received due process. If the student's academic record and/or submitted information support termination/dismissal, the student will be dismissed from the program and the Graduate School. If suspension is recommended and supported by the academic record and submitted information, the student will be suspended per the request. The student will be notified by email and US mail. The program will be notified by email.

Written Appeal Procedure

1. Should the student wish to appeal the Assistant Dean's decision, the student should submit a written response to the Dean within 1 week of receiving the written notice of suspension or termination/dismissal. The appeal should include rationale for the appeal and desired outcome. The student also may request a personal interview with the Dean to discuss the situation after they have submitted their written appeal.
2. The final decision rests with the Dean of the Graduate School. At the Dean's discretion, he/she may discuss the Assistant Dean's decision with the involved faculty

and student's program, as well as any other persons affected by the recommended resolutions.

3. The Dean will notify the student of her/his decision by email and certified U.S. mail within 5 working days of submission of the appeal or interview with the student (whichever falls last). The decision of the Dean is final.

4. If the student is suspended, terminated/dismissed, or otherwise unable to continue his or her academic studies either temporarily or permanently because of disciplinary or other action, the Dean shall notify the appropriate CU Registrar of the change in the student's academic status and order the Registrar to suspend the student's registration.

Appendix S: Non-Discrimination Policy

Non-Discrimination

The University of Colorado does not discriminate on the basis of race, color, national origin, sex, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation, or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes action to increase ethnic, cultural, and gender diversity, to employ qualified disabled individuals, and to provide equal opportunity to all students and employees.

Qualification for the position and institutional need shall be the sole bases for hiring employees, and the criteria for retaining employees shall be related to performance evaluation, assessment of institutional need, fiscal constraints, and/or, in the case of exempt professionals, the rational exercise of administrative prerogative.

All students shall have the same fundamental rights to equal respect, due process, and judgment of them based solely on factors demonstrably related to performance and expectations as students. All students share equally the obligations to perform their duties and exercise judgments of others in accordance with the basic standards of fairness, equity, and inquiry that should always guide education.

History: Amended November 8, 2001; September 17, 2013; April 17, 2015, November 6, 2015.
([Law of the Regents, Article 5D](#))

Title IX Notice of Non-Discrimination

The University of Colorado Denver | Anschutz Medical Campus (“the University”) is committed to maintaining a positive learning, working and living environment. The University prohibits discrimination on the basis of race, color, national origin, sex, age, disability, pregnancy, creed, religion, sexual orientation, veteran status, gender identity, gender expression, political philosophy or political affiliation in admission and access to, and treatment and employment in, its educational programs and activities.

The University prohibition against any act of sexual misconduct or related retaliation applies to all students, faculty, staff, contractors, patients, volunteers, affiliated entities, and other third parties and applies to conduct that occurs on campus and off-campus conduct, including on-line or electronic conduct as noted in the University policy. Violations may be subject to disciplinary action. The University will consider what appropriate potential actions should be taken.

The University employs trained staff members who have responsibility for Title IX compliance. The Title IX Coordinator oversees the development, implementation, and evaluation of Title IX policies, procedures, and training efforts and will refer all reports to a trained Title IX Investigator.

To submit a concern, please fill out the online form at <https://www1.ucdenver.edu/offices/equity/resolutions/make-a-report>, or to ask further questions about Title IX, please contact the University Title IX Coordinator:

Elizabeth Schrock, Title IX Coordinator
Lawrence Street Center, 1380 Lawrence Street, 12th Floor, Denver, CO 80204
